Important Change for 1997

Electronic deposit requirement. If your total deposits of social security, Medicare, and withheld income taxes were more than \$50,000 in 1995, you must make electronic deposits for all depository tax liabilities that occur after June 30, 1997. For more information, see *Electronic deposit requirement* under *Payment of Tax*, later.

Introduction

This publication discusses the general tax laws that apply to ordinary domestic corporations. It explains the tax law in plain language so that it will be easier to understand. However, the information provided does not cover every situation, replace the law, or change its meaning.

If your corporation has a net operating loss, see Publication 536, *Net Operating Losses*. Also, some corporations may meet the qualifications for electing to be S corporations. For information on S corporations, see the instructions for Form 1120S.

See the sample filled-in Forms 1120 and 1120-A near the end of this publication.

What Is a Corporation?

A **corporation**, is generally a company that is legally chartered as a corporation by a state. However, for federal tax purposes, this includes associations, joint-stock companies, and insurance companies.

Organizations of professional people. Organizations of doctors, lawyers, and other professional people organized under state professional association acts are generally recognized as corporations for federal income tax purposes. A professional service organization must be both **organized** and **operated** as a corporation to be classified as one. All states and the District of Columbia have professional association acts.

Unincorporated organizations. Unincorporated organizations having certain corporate characteristics are associations taxed as corporations. To be treated as a corporation for tax purposes, the organization must have associates and be organized to carry on business and divide the gains from the business. In addition, the organization must have a majority of the following characteristics:

- 1) Continuity of life,
- 2) Centralization of management,
- 3) Limited liability, and
- 4) Free transferability of interests.

Other factors may also be significant in classifying an organization as an association. Treat an organization as an association if its characteristics make it more nearly resemble a corporation than a partnership or trust. The facts in each case determine which characteristics are present.

Forming a Corporation

Forming a corporation involves a transfer of money, property, or both by prospective shareholders in exchange for capital stock in the corporation.

Issuance of Stock

If one or more persons transfer money or property to a corporation solely in exchange for stock of that corporation, and immediately after the exchange they control the corporation, neither the transferors nor the transferee corporation recognizes gain or loss.

The transferors must be in control of the corporation immediately after the exchange. To be in control, the transferors must, as a group, own:

- 1) At least 80% of the total combined voting power of all classes of stock entitled to vote, and
- 2) At least 80% of the total number of shares of all other classes of stock.

Transferor's loss. A transferor who has a loss from an exchange and who owns more than 50% of the corporation's stock cannot deduct the loss. This is true even if the transferor does not control the corporation (owns less than 80% of its stock). See *Sales and Exchanges Between Related Parties* and its discussion *Nondeductible Loss* in chapter 2 of Publication 544, *Sales and Other Dispositions of Assets*.

Transfer of services. Transfer of your services to a corporation in return for stock results in taxable pay to you.

Property or money received. If you receive property or money in addition to stock in exchange for the property you transferred, any gain may be taxable. Gain is taxable only to the extent of the money and fair market value (FMV) of other property you receive. Property includes securities of the corporation.

Fair market value (FMV). Fair market value (FMV) is the price at which property would change hands between a buyer and seller, neither being required to buy or sell, and both having reasonable knowledge of all relevant facts.

Transfer of Mortgaged Property

If you transfer mortgaged property to a corporation you control, you generally do not recognize gain or loss. If the corporation assumes

your liabilities or takes property subject to liability, you generally do not recognize gain or loss.

Gain if liability exceeds basis. If the corporation assumes or takes your property subject to an amount of liability that is more than your adjusted basis of the transferred property, the excess amount is your taxable gain.

Liabilities you can exclude. To determine the excess amount of liability described in the preceding paragraph, you can exclude certain liabilities. These excludable liabilities are the type that would give rise to a deduction if you had paid them. For example, you can exclude trade accounts payable, and other liabilities such as interest and taxes that relate to a transferred trade or business. Your basis in this stock you receive from a corporation is not reduced by the excluded liabilities.

Liabilities you cannot exclude. You cannot exclude a liability if:

- 1) A deduction for it has already been claimed, or
- 2) When the liability was incurred it created or increased the basis of any property.

For example, a cash basis taxpayer bought some small handtools on credit which are used in his business. However, before paying the liability, he transfers the handtools and the liability to a controlled corporation. This liability cannot be excluded because when it was incurred, it created a basis in the asset for the taxpayer which offsets the liability.

No gain for certain reorganizations. Even if your liability exceeds basis in the preceding transfers, the excess liability rule for recognizing gain does not apply to transfers you make as part of a:

- 1) Title 11 or similar plan of reorganization under section 368(a)(1)(G) of the Internal Revenue Code, or
- 2) Reorganization that is a mere change in identity, form, or place of organization, under section 368(a)(1)(F) of the Code.

Gain if transfer made for nonbusiness purpose. Even if your liability exceeds basis on a transfer to your controlled corporation, if you had no bona fide business purpose in making the transfer or you did so to avoid federal income tax, you cannot use the excess liability rule to figure any taxable gain. Instead, the gain is taxable to the extent of all the liabilities you transferred or the corporation assumed plus the fair market value of any property (other than the corporation's stock) you received in the exchange.

Gain or Loss Not Recognized

A corporation does not recognize gain or loss if you transfer property and money to the corporation in exchange for corporation stock (including treasury stock). A corporation does not recognize gain or loss on the acquisition or lapse of an option to buy or sell its stock (including treasury stock).

Transfer to Foreign Corporations

Generally, you recognize gain on the transfer of property to a foreign corporation. Exceptions allow nonrecognition of gain on a transfer of certain property (see section 367(a)(3) of the Internal Revenue Code).

Basis of Stock

The basis of stock received for the property transferred to a corporation is the same as the basis of property transferred with certain adjustments. The basis is **decreased** by:

- The FMV of any other property (except money) you receive,
- Any money you receive, and
- Any loss recognized on the exchange.

The basis is **increased** by:

- Any amount treated as a dividend, and
- Any gain recognized on the exchange.

The basis of property received, other than money or stock, is its FMV.

Assumption of liability. If, in return for stock, securities, or other property, you transfer to a corporation property subject to a liability, treat the amount of the liability as money received by you for determining your basis. If the corporation assumes your liability, treat the amount of the liability as money received for determining your basis. This rule does not apply to any liabilities you excluded under the excess liability rule discussed previously in *Gain if liability exceeds basis under Transfer of Mortgaged Property*.

Basis of Property Transferred

Generally, the basis of property a corporation receives from you in exchange for its stock:

- 1) In an 80% control transaction,
- 2) As paid-in surplus, or
- 3) As a contribution to capital

has the same basis you had in the property increased by any gain you recognized on the exchange.

Basis pursuant to reorganization. However, the general rule discussed in the preceding paragraph does not apply if the property is received in a reorganization and consists of stock or securities in a corporation that is a party to the reorganization unless that property is received in exchange for stock or securities of the transferee (or a corporation that is in control of the transferee) as the consideration in whole or in part for the transfer.

Transferor not in control of corporation. If a corporation receives property by issuing stock for it, other than in an 80% control transaction, its basis for the property is usually the FMV of the stock at the time of the exchange. The corporation can use evidence of the FMV of the transferred property to set the value of the stock if:

- 1) The stock has no established value, and
- 2) It issues all outstanding stock in exchange for that property.

Start-Up Expenses

A corporation may not take a deduction for start-up expenses unless it chooses to treat those expenses as deferred expenses and amortize them. When you amortize start-up expenses, deduct them in equal amounts over a period of 60 months or more. The amortization period starts in the month you start or acquire the active business.

A start-up expense is one you pay or incur for:

- 1) Creating an active trade or business, or
- 2) Investigating the possibility of creating or acquiring an active trade or business.

However, to be amortizable, it must be deductible if paid or incurred in the operation of an existing trade or business in the same field.

Start-up expenses also include amounts you pay or incur in any activity engaged in for profit and for the production of income in anticipation of the activity becoming an active trade or business. Start-up expenses are treated differently than organizational expenses, discussed later.

Start-up expenses are those you have before you begin business operations. They include expenses both for investigating a prospective business and getting the business started. For example, they may include costs for the following items:

- A survey of potential markets,
- An analysis of available facilities, labor supply, etc.,
- Advertisements for the opening of your business,
- Salaries and wages for employees who are being trained, and for their instructors,
- Travel and other necessary expenses for lining up distributors, suppliers, or customers, and
- Salaries and fees for executives, consultants, or for other professional services.

Start-up expenses do not include interest, taxes, or research and experimental expenses allowable as deductions.

Choosing to amortize. If you want to amortize start-up expenses, complete Part VI of Form 4562. Attach it to the corporation's tax return for the tax year the amortization period starts. Also, attach a statement to the return. It should show the total amount of those expenses, and describe what they were for, date incurred, month the corporation began business, and months in the amortization period (not less than 60). File the return and statement by the due date of the return (including extensions).

Organizational Expenses

A newly organized corporation may choose to treat its organizational expenses as deferred expenses and amortize them. To amortize, deduct the expenses in equal monthly amounts over a period of 60 months or more. The period starts with the first month the corporation actively engages in business. If the corporation does not make this choice, capitalize and deduct these expenses only in the year the corporation finally liquidates. The corporation must incur these expenses before the end of the first tax year it is in business.

Organizational expenses are those directly for the creation of the corporation that would be chargeable to the capital account. If spent for the creation of a corporation having a limited life, the expenses are amortizable over that limited life. They include expenses of temporary directors, organizational meetings of directors or shareholders, fees paid to a state for incorporation, and accounting or legal services incident to the organization. These services include drafting the charter, the bylaws, minutes of organizational meetings, and terms of the original stock certificates.

Expenses for issuance or sale of stock. A corporation cannot deduct or amortize expenses for issuance or sale of stock or securities, such as commissions, professional fees, and printing costs. No deduction or amortization is allowable for the expenses of transferring assets to the corporation.

Time and manner of choosing. If a corporation wants to amortize organizational expenses, it must choose to do so when it files its return for the first tax year it actively engages in business. Make the choice by the due date (including extensions) of the return for that tax year. The corporation completes Part VI of Form 4562 and attaches it to its return. It must also attach a statement to its return.

The statement should show the description, amount of the expenses, date incurred, month the corporation began business, and months (not less than 60) over which the corporation will deduct the expenses. The time over which the corporation chooses to amortize its organizational expenses is binding.

Start of business. Generally, a corporation starts business when it starts the activities for which it was organized. However, consider a corporation to have begun business when its activities reach the point necessary to establish the nature of its business operations. For example, if a corporation acquires the assets necessary to operate its business, it may be considered to have begun business activities.

Special Provisions

Rules on income and deductions that apply to individuals also apply, for the most part, to corporations. However, some of the following special provisions apply only to corporations.

Below-Market Loan

If a corporation issues a shareholder or an employee a below-market loan, the corporation reports additional income.

A below-market loan is a loan which provides for no interest or interest at a rate below the federal rate that applies. Treat a below-market loan as an arm's-length transaction in which the lender is considered to have made:

- 1) A loan to the borrower in exchange for a note that requires payment of interest at the applicable federal rate, and
- 2) A payment to the borrower.

Treat the lender's payment to the borrower as a gift, dividend, contribution to capital, payment of wages, or other payment, depending on the substance of the transaction.

See *Below-Market Interest Rate Loans* in chapter 8 of Publication 535 for more information.

Transfer of Stock to Creditor

If a corporation transfers its stock in satisfaction of indebtedness and the fair market value of its stock is less than the indebtedness it owes, the corporation has income (to the extent of the difference) from the cancellation of indebtedness. After 1994, a corporation can exclude all or a portion of the income created by the stock for debt transfer if it is in a bankruptcy proceeding or, if it is not in a bankruptcy proceeding, it can exclude the income to the extent it is insolvent. However, the corporation must reduce its tax attributes (to the extent it has any) generally by the amount of excluded income.

Stock for debt exception. The stock for debt exception was repealed for transfers made after 1994, unless the corporation filed for bankruptcy (or similar court proceeding) before 1994. Generally, before 1995, a corporation did not realize income because of these stock for debt exchanges if it was in bankruptcy or to the extent it is insolvent. Consequently, there was no gross income to exclude and no reduction of its tax attributes was necessary. The principal difference between the stock for debt exception and the stock for debt exchange is that the corporation does not reduce its tax attributes under the stock for debt exception.

Golden Parachute Payments

Corporations may enter into "golden parachute" contracts with key personnel. Under a typical golden parachute contract, the corporation agrees to make payments to certain officers, shareholders, or highly compensated individuals in certain events. The contract provides for payment when there is:

- 1) A change in the ownership or control of the corporation, or
- 2) A change in the ownership of a substantial part of the corporation's assets.

The corporation's deduction is limited if the total present value of the payments to any officer, shareholder, or highly compensated individual equals or exceeds three times the recipient's base amount. It cannot deduct the excess of any parachute payment over the part of the base amount allocated to the payment.

The **base amount** is the average annualized includible pay that was payable to the recipient by the corporation during the 5 tax years ending before the date of the change in ownership or control. The law imposes a non-deductible excise tax of 20% of these payments on the recipient in addition to regular income tax. For more information, see section 280G of the Internal Revenue Code.

U.S. Real Property Interests

If a domestic corporation acquires a U.S. real property interest from a foreign person or firm, the corporation may have to withhold tax on the amount it pays for the property. The amount paid includes cash, the FMV of other property, and any assumed liability. If a domestic corporation distributes a U.S. real property interest to a foreign person or firm, it may have to withhold tax on the FMV of the property. A corporation that fails to withhold may be liable for the tax, penalties that apply, and interest. For more information, see *U.S. Real Property Interest* in Publication 515.

Adjustments-Tax Preferences

Tax law gives special treatment to some items of income and deduction called adjustments or tax preference items. They may result in an additional tax called the alternative minimum tax (discussed later). The corporation adjusts the following items before it takes them into account in determining its taxable income:

- **Section 1250 capital gain treatment.** For section 1250 property disposed of during the tax year, 20% of any excess of (a) the amount that would be ordinary income if the property was section 1245 property over (b) the amount treated as ordinary income under section 1250, must be recognized as ordinary income under section 1250.

Section 1250 property. This includes all real property that is subject to an allowance for depreciation and that is not and never has been section 1245 property.

Section 1245 property. This includes:

- a) Any property that is or has been subject to an allowance for depreciation, and
- b) Any intangible property placed in service after August 10, 1993, that is subject to amortization under section 197 of the Internal Revenue Code

if this property is either personal property or other section 1245 property described in chapter 4 of Publication 544, *Sales and Other Dispositions of Assets*.

- **Percentage depletion.** For iron ore and coal (including lignite), reduce the allowable percentage depletion deduction by 20% of any excess of (a) the percentage depletion

deduction allowable for the tax year (determined without this adjustment), over (b) the adjusted basis of the depletable property at the close of the tax year (figured without the depletion deduction for the tax year).

- **Pollution control facilities.** Reduce the amortizable basis of pollution control facilities by 20% in determining the amortization deduction for that property.
- **Mineral exploration and development costs.** Reduce the allowable deduction for these costs by 30%. Special rules apply to the amount not allowed because of this adjustment. This reduction also applies to the **intangible drilling costs** of an integrated oil company. See section 291(b) of the Internal Revenue Code for more information.

These adjustments apply to all corporations. However, they do not apply to an S corporation unless it was a C corporation for any of the 3 immediately preceding tax years.

Dividends-Received Deduction

A corporation can deduct a percentage of certain dividends received during its tax year.

Dividends from domestic corporations. A corporation can deduct, with certain limits, 70% of the dividends received if the corporation receiving the dividend owns less than 20% of the distributing corporation.

20%-or-more owners allowed 80% deduction. A corporation can deduct, with certain limits, 80% of the dividends received or accrued if it owns 20% or more of the paying domestic corporation. The paying corporation is a **20%-owned corporation**.

Ownership. Determine ownership, for these rules, by the amount of voting power and value of the paying corporation's stock (other than certain preferred stock) the receiving corporation owns.

Dividends on debt-financed portfolio stock. For dividends received on debt-financed portfolio stock of domestic corporations, reduce the 70% or 80% dividends-received deduction. Reduce the deduction by a percentage related to the amount of debt incurred to purchase the stock. This applies to stock whose holding period begins after July 18, 1984. For more information, see section 246A of the Internal Revenue Code.

Small business investment companies. Small business investment companies can deduct 100% of the dividends received from a taxable domestic corporation.

Affiliated corporations. Members of an affiliated group of corporations can deduct 100% of the dividends received from a member of the same affiliated group if they meet certain conditions. See section 243 of the Internal Revenue Code for the definition of an affiliated group of corporations.

Dividends from regulated investment company. Regulated investment company dividends received are subject to certain limits. Capital gain dividends do not qualify for the deduction. For more information, see section 854 of the Internal Revenue Code.

Dividends on preferred stock of public utilities. A corporation can deduct 42% of the dividends it receives on certain preferred stock (issued before October 1942) of a less-than-20%-owned taxable public utility. A corporation can deduct 48% of the dividends it receives on certain preferred stock of a 20%-or-more-owned taxable public utility. For more information, see section 244 of the Internal Revenue Code.

Dividends from Federal Home Loan Banks. Certain dividends received from Federal Home Loan Banks qualify for the dividends-received deduction. For more information, see section 246 of the Internal Revenue Code.

Dividends from foreign corporations. A corporation can deduct a percentage of the dividends it receives from 10%-owned foreign corporations. For more information, see section 245 of the Internal Revenue Code.

No deduction allowed for certain dividends. Corporations cannot take a deduction for dividends received from:

- 1) A real estate investment trust,
- 2) A corporation exempt from tax either for the tax year of the distribution or the preceding tax year,
- 3) A corporation whose stock has been held by your corporation for 45 days or less,
- 4) A corporation whose stock has been held by your corporation for 90 days or less, if the stock has preference as to dividends and the dividends received on it are for a period or periods totaling more than 366 days, or
- 5) Any corporation, if your corporation is under an obligation (pursuant to a short sale or otherwise) to make related payments for positions in substantially similar or related property.

Dividends on deposits. So-called dividends on deposits or withdrawable accounts in domestic building and loan associations, mutual savings banks, cooperative banks, and similar organizations are interest. They do not qualify for this deduction.

Limit on deduction for dividends. The total deduction for dividends received or accrued is generally limited (in the following order) to:

- 1) 80% of the difference between taxable income and the 100% deduction allowed for dividends received from affiliated corporations, or by a small business investment company, for dividends received or accrued from 20%-owned corporations, and

- 2) 70% of the difference between taxable income and the 100% deduction allowed for dividends received from affiliated corporations, or by a small business investment company, for dividends received or accrued from less-than-20%-owned corporations (reducing taxable income by the total dividends received from 20%-owned corporations).

Figuring limit. In figuring this limit, determine taxable income without:

- 1) The net operating loss deduction,
- 2) The deduction for dividends received,
- 3) Any adjustment due to the part of an extraordinary dividend that is not taxable (see *Reduction in Basis of Stock*, later),
- 4) The deduction for contributions to a Capital Construction Fund (CCF), and
- 5) Any capital loss carryback to the tax year.

Effect of net operating loss. If a corporation has a net operating loss for a tax year, the limit of 80% (or 70%) of taxable income does not apply. To determine whether a corporation has a net operating loss, figure the dividends-received deduction without the 80% (or 70%) of taxable income limit.

Example 1. A corporation loses \$25,000 from operations. It receives \$100,000 in dividends from a 20%-owned corporation. Its taxable income is \$75,000 before the deduction for dividends received. If it claims the full dividends-received deduction of \$80,000 ($\$100,000 \times 80\%$) and combines it with the operations loss of \$25,000, it will have a net operating loss of \$5,000. The 80% of taxable income limit does not apply. The corporation can deduct \$80,000.

Example 2. Assume the same facts as in Example 1 except that the corporation loses \$15,000 from operations. Its taxable income is \$85,000 before the deduction for dividends received. However, after claiming the dividends-received deduction of \$80,000 ($\$100,000 \times 80\%$), its taxable income is \$5,000. But because the corporation will not have a net operating loss after a full dividends-received deduction, its allowable dividends-received deduction is limited to 80% of its taxable income, or \$68,000 ($\$85,000 \times 80\%$).

Reduction in Basis of Stock

If a corporation receives an **extraordinary dividend** on stock held 2 years or less before the dividend announcement date, it reduces its basis in the stock by the nontaxed part of the dividend. Do not reduce the basis of the stock below zero. The total nontaxed part of dividends on stock that did not reduce the basis of the stock, due to the limit on reducing basis below zero, is treated as gain from the sale or exchange of the stock for the tax year you sell or exchange the stock.

An **extraordinary dividend** is any dividend on stock that equals or exceeds a certain percentage of the corporation's adjusted basis in the stock. The percentages are:

- 1) 5% for stock preferred as to dividends, or
- 2) 10% for other stock

Treat all dividends received that have ex-dividend dates within an 85-consecutive-day period as one dividend. Treat all dividends received that have ex-dividend dates within a 365-consecutive-day period as extraordinary dividends if the total of the dividends exceeds 20% of the corporation's adjusted basis in the stock. Do not include qualifying dividends, discussed earlier under *Affiliated corporations*, in the definition of extraordinary dividends.

A corporation can elect to determine whether the dividend is extraordinary by using the FMV of the stock rather than its adjusted basis. To make this election, the corporation must establish to the satisfaction of the IRS, the FMV of the stock as of the day before the ex-dividend date. (See Revenue Procedure 87-33 in the Cumulative Bulletin, Volume 1987-2, on page 402.)

The **nontaxed part** is any dividends-received deduction allowable for the dividends.

The **dividend announcement date** is the date the corporation declares, announces, or agrees to either the amount or the payment of the dividend, whichever is earliest.

Disqualified preferred stock. Any dividend on disqualified preferred stock is treated as an extraordinary dividend regardless of the period the corporation held the stock.

Disqualified preferred stock is any stock preferred as to dividends if:

- 1) The stock when issued has a dividend rate that declines (or can reasonably be expected to decline) in the future,
- 2) The issue price of the stock exceeds its liquidation rights or stated redemption price, or
- 3) The stock is otherwise structured to avoid the rules for extraordinary dividends and to enable corporate shareholders to reduce tax through a combination of dividends-received deductions and loss on the disposition of the stock.

These rules apply to stock issued after July 10, 1989, unless issued under a written binding contract in effect on that date and thereafter before the issuance of the stock.

Charitable Contributions

A corporation can claim a limited deduction for any charitable contributions made in cash or other property. The contribution is deductible if made to or for the use of community chests, funds, foundations, corporations, or trusts organized and operated exclusively for religious, charitable, scientific, literary, or educational purposes. The contribution can also be made to foster national or international amateur sports competition or the prevention of cruelty to children or animals.

You cannot take a deduction if any of the net earnings of an organization receiving contributions benefit any private shareholder or individual.

Cash method corporation. A corporation using the cash method of accounting can deduct contributions only in the tax year paid.

Accrual method corporation. A corporation using an accrual method of accounting can choose to deduct unpaid contributions for the tax year the board of directors authorizes them if it pays them within 2 ½ months after the close of that tax year. Make the choice by reporting the contribution on the corporation's return for the tax year. A copy of the resolution authorizing the contribution and a declaration stating the board of directors adopted the resolution during the tax year must accompany the return. The president or other principal officer must sign the declaration.

Limit. A corporation cannot deduct contributions that total more than 10% of its taxable income. Figure taxable income for this purpose without the following:

- Deduction for contributions,
- Deductions for dividends received and dividends paid,
- Deduction for contributions to a Capital Construction Fund (CCF),
- Any net operating loss carryback to the tax year, and
- Any capital loss carryback to the tax year.

Carryover of excess contributions. You can carry over (with certain limits) any charitable contributions made during the year that are more than the 10% limit to each of the following 5 years. You lose any excess not used within that period. For example, if a corporation has a carryover of excess contributions paid in 1995 and it does not use all the excess on its return for 1996, it can carry the rest over to 1997, 1998, 1999, and 2000. Do not deduct a carryover of excess contributions in the carryover year until after you deduct contributions made in that year (subject to the 10% limit). You cannot deduct a carryover of excess contributions to the extent it increases a net operating loss carryover to a succeeding tax year.

Capital Losses

A corporation, other than an S corporation, can deduct capital losses only up to its capital gains. In other words, if a corporation has a net capital loss, it cannot deduct the loss in the current tax year. It carries the loss to other tax years and deducts it from capital gains that occur in those years.

First, carry a net capital loss back 3 years. Deduct it from any total net capital gain which occurred in that year. If you do not deduct the full loss, carry it forward 1 year (2 years back) and then 1 more year (1 year back). If any loss remains, carry it over to future tax years, 1 year at a time, for up to 5 years. When you carry a net capital loss to another tax year, treat it as a short-term loss. It does not retain its original identity as long term or short term.

Example. In 1996, a corporation has a net short-term capital gain of \$3,000 and a net long-term capital loss of \$9,000. The short-term gain offsets some of the long-term loss,

leaving a net capital loss of \$6,000. It treats this \$6,000 as a short-term loss when carried back or forward.

The corporation carries the \$6,000 short-term loss back 3 years to 1993. In 1993, the corporation had a net short-term capital gain of \$8,000 and a net long-term capital gain of \$5,000. It subtracts the \$6,000 short-term loss from 1996 first from the net short-term gain. This results in a net capital gain for 1993 of \$7,000. This consists of a net short-term capital gain of \$2,000 (\$8,000 – \$6,000) and a net long-term capital gain of \$5,000.

S corporation status. A corporation may not carry a capital loss from, or to, a year for which it is an S corporation.

Rules for carryover and carryback. When carrying a capital loss from one year to another, the following rules apply:

When figuring this year's net capital loss, you cannot use any capital loss carried from another year. In other words, you may only carry capital losses to years that would otherwise have a total net capital gain.

If you carry capital losses from 2 or more years to the same year, deduct the loss from the earliest year first. When you fully deduct that loss, deduct the loss from the next earliest year, and so on.

You cannot use a capital loss carried from another year to produce or increase a net operating loss in the year to which you carry it.

Foreign expropriation losses. A corporation cannot carry back foreign expropriation capital losses. However, it may carry these losses over for up to 10 future tax years. Treat the losses as short-term capital losses in each year to which you carry them.

Refunds. When you carry back a capital loss to an earlier tax year, refigure your tax for that year. If your corrected tax is less than you originally owed, you may apply for a refund. File Form 1120X.

Related Taxpayers

The related party rules apply to:

- 1) An individual and a corporation the individual controls,
- 2) Two corporations that are members of the same controlled group,
- 3) A partnership and a corporation owned by the same person, and
- 4) An S corporation and a C corporation if owned by the same person.

These rules deny the deduction of losses on the sale or exchange of property between related parties. They also deny the deduction of certain unpaid business expenses and interest on transactions between the parties. Losses on the sale or exchange of property between members of the same controlled group of corporations are deferred rather than

denied. Under certain conditions, the IRS may reallocate income and deductions between two or more businesses directly or indirectly controlled by the same interests.

For an explanation of these tax rules, see chapters 2 and 8 of Publication 535, and Publication 544.

Accrual basis corporation. An accrual basis taxpayer cannot deduct expenses owed to a related cash basis person until payment is made, and the amount is includible in the gross income of the person paid. This rule applies even if the relationship ceases before the amount is includible in the gross income of the person paid.

Complete liquidations. The disallowance of losses from the sale or exchange of property between related parties does not apply to liquidating distributions. It does not apply to any loss of either the distributing corporation or a distributee for a distribution in complete liquidation.

Interest paid to related parties. A corporation's deduction for interest expense may be limited if it paid (or accrued) interest to related parties **not subject to tax on the interest received**. The deduction for this interest is disallowed for any tax year that the corporation has:

- 1) Excess interest expense, and
- 2) A debt to equity ratio greater than 1.5 to 1 at the end of that tax year.

However, the deduction is disallowed only to the extent of the corporation's excess interest expense. The corporation can carry the disallowed interest to later years.

Not subject to tax on the interest means that the related party is not subject to U.S. income tax on the interest income. For example, the related party may be a foreign parent corporation not subject to U.S. tax.

Excess interest expense. Excess interest expense is the excess of the corporation's net interest expense over the sum of 50% of its adjusted taxable income plus any **excess limit** carryforward.

Excess limit. Excess limit means the excess of 50% of the corporation's adjusted taxable income over its net interest expense.

If a corporation has an excess limit for a tax year, that amount becomes an excess limit carryforward to the next tax year. When the corporation does not use it up in the next tax year, it can carry it forward to the following 2 tax years.

More information. For more information, including the definition of **adjusted taxable income**, see section 163(j) of the Internal Revenue Code.

Net Income or Loss

At the end of each tax year, a corporation figures its net income or loss. To do this, subtract the operating expenses and other allowable deductions from gross income. Figure the

corporation's tax as explained under *Figuring Tax*.

The at-risk rules apply to closely held corporations that engage in any activity as a trade or business or for the production of income. These rules limit a corporation's loss.

The at-risk rules generally do not apply to a qualifying business that is an active business of a qualified corporation. For more information on the at-risk rules, see Publication 925.

Figuring Tax

Corporate taxable income is subject to the tax rates shown in Table 1.

Controlled group of corporations. A controlled group of corporations gets only one apportionable \$50,000, \$25,000, and \$9,925,000 (in that order) amount for each taxable income bracket. For more information, see the instructions for Schedule J of Form 1120.

Personal service corporations. The tax rate for qualified personal service corporations is 35% of taxable income. These corporations cannot use the graduated tax rates that apply to other corporations.

A corporation is a **qualified personal service corporation** if:

- 1) At least 95% of the value of its stock is held by employees, or their estates or beneficiaries, and
- 2) Its employees perform services at least 95% of the time in any of the following fields:
 - Health,
 - Law,
 - Engineering,
 - Architecture,
 - Accounting,
 - Actuarial science,
 - Veterinary services,
 - Performing arts, or
 - Consulting.

Credits

A corporation **decreases** its tax liability by credits, such as the:

- 1) Credit for fuels used for certain purposes (see Publication 378),
- 2) Foreign tax credit (use Form 1118),
- 3) General business credit (see *General business credit*, below),
- 4) Possessions tax credit (use Form 5735),
- 5) Credit for fuel produced from a nonconventional source, and
- 6) Qualified electric vehicle credit (use Form 8834).

General business credit. The general business credit includes the:

- Investment credit (Form 3468),

Table 1. **Tax Rate Schedule**

If taxable income (line 30, Form 1120, or line 26, Form 1120-A) on page 1 is:

Over—	But not over—	Tax is:	Of the amount over—
\$0	\$50,000	15%	\$0
50,000	75,000	\$7,500 + 25%	50,000
75,000	100,000	13,750 + 34%	75,000
100,000	335,000	22,250 + 39%	100,000
335,000	10,000,000	113,900 + 34%	335,000
10,000,000	15,000,000	3,400,000 + 35%	10,000,000
15,000,000	18,333,333	5,150,000 + 38%	15,000,000
18,333,333	----	35%	0

- Work opportunity credit (Form 5884)(replaces jobs credit),
- Alcohol fuels credit (Form 6478),
- Research credit (Form 6765),
- Low-income housing credit (Form 8586),
- Orphan drug credit (Form 8820),
- Disabled access credit (Form 8826),
- Enhanced oil recovery credit (Form 8830),
- Renewable electricity production credit (Form 8835),
- Empowerment zone employment credit (Form 8844),
- Indian employment credit (Form 8845),
- Credit for employer social security and Medicare taxes paid on certain employee tips (Form 8846), and
- Credit for contributions to certain community development corporations (Form 8847).

Disregarding any empowerment zone employment credit, if you have only one current year business credit, no carryback or carryover, and the credit (other than the low-income housing credit) is not from a passive activity, do not file Form 3800. Instead, file only the credit form that applies to claim the general business credit. For information about passive activity credits, see Form 8582-CR.

Form 3800. If you have more than one credit, a carryback or carryover, or a credit (other than the low-income housing credit) from a passive activity, you must use Form 3800 to figure your general business credit.

See the instructions to Form 3800 for more information.

Other Taxes

A corporation **increases** its tax liability by the:

- 1) Personal holding company tax (attach Schedule PH (Form 1120)),
- 2) Investment credit recapture (Form 4255),
- 3) Low-income housing credit recapture (Form 8611),

- 4) Qualified electric vehicle credit recapture,
- 5) Indian employment credit recapture, and
- 6) Alternative minimum tax.

Alternative Minimum Tax (AMT)

The tax laws give special treatment to certain kinds of income and allow special deductions and credits for certain kinds of expenses. So that taxpayers who benefit from these laws will pay at least a minimum amount of tax, a special tax was enacted, the "alternative minimum tax (AMT)" for corporations and individuals.

The rules discussed in this section apply to corporations. For information on the alternative minimum tax rules that apply to individuals, see Form 6251, *Alternative Minimum Tax—Individuals* and its instructions.

The AMT rate for corporations is 20%. There is an exemption of up to \$40,000. This amount is reduced (but not below zero) by 25% of the amount by which alternative minimum taxable income (AMTI) exceeds \$150,000.

You can apply a minimum tax credit against your regular tax liability in later years for the AMT caused by certain preferences and adjustments.

The adjustment and preference items for AMT purposes are listed in *Table 2* with a brief description for each item. However, each adjustment and preference item is discussed in more detail separately. These adjustment and preference items are reported on Form 4626 in figuring AMT.

Form 4626. You use Form 4626 to figure the corporation's AMT. File this form if the corporation's taxable income before the net operating loss (NOL) deduction plus adjustments and preference items totals more than the allowable exemption amount.

Formula to figure AMT. You figure the AMT by beginning with **taxable income before any net operating loss deduction** on the return. For Form 1120, this is line 28 minus line 29b and for Form 1120-A, it is line 24 minus line 25b. With that taxable income, use the following formula to figure AMT.

Add or subtract

Adjustments and preferences

Equals

Preadjustment alternative minimum taxable income

Add or subtract

Alternative minimum tax

Adjustments and Preferences

To figure AMT, you make certain adjustments to the taxable income on the return. These adjustments eliminate the tax advantages of certain items that receive preferential tax treatment. These items are called "adjustments and preferences." The adjustment for these items is the difference between the recomputed item for AMT purposes and the amount on the return. They can be either increases or decreases (entered as negative amounts on Form 4626).

Increase or decrease. If an expense or loss claimed for regular tax purposes is more than the recomputed AMT expense or loss, the difference is an increase to taxable income. If the expense or loss claimed for regular tax purposes is less than the recomputed AMT expense or loss, the difference is a decrease to taxable income.

If income or gain reported for regular tax purposes is less than the recomputed AMT income or gain, the difference is an increase to taxable income. If the income or gain reported for regular tax purposes is more than the recomputed AMT income or gain, the difference is a decrease to taxable income.

Accelerated depreciation on property. This adjustment applies to property placed in service after 1986. The depreciation deduction used for AMT is the amount calculated under the alternative depreciation system (ADS) under the modified accelerated cost recovery system (MACRS). For real property, use the straight line method with a 40-year recovery period and the mid-month convention. For most property other than real property, use the 150% declining balance method, switching to the straight line method when it gives a larger allowance. For more information on depreciation, see Publication 946.

This adjustment applies to property placed in service after 1986, other than transition property not subject to MACRS. It also applies to property placed in service after July 31, 1986, and before 1987, if you elected to use MACRS.

Do not consider the following types of property in figuring this adjustment item.

Property you elect to exclude from MACRS that is depreciated under the unit-of-production method or most other methods of depreciation not expressed in terms of years,

Certain public utility property,

Any motion picture film or video tape, or

Any sound recording.

The adjustment is the difference between the total depreciation for all property for alternative minimum tax purposes and the total depreciation for regular income tax purposes.

The effect of using two different types of depreciation (one for regular income tax and one for alternative minimum tax) is that a corporation will have a different basis in the property for alternative minimum tax. This means, for example, that if a corporation sells the property, the gain will be different for alternative minimum tax purposes. See the later discussion of *Adjusted gain or loss*.

Depreciation for property placed in service before 1987. For property placed in service before 1987, accelerated depreciation is a preference item. Continue to treat depreciation on that property as a preference item. See *Accelerated depreciation on real property placed in service before 1987* and *Accelerated depreciation on leased personal property placed in service before 1987*, discussed later.

Certified pollution control facilities. For the AMT, determine your amortization deduction for a certified pollution control facility using the alternative depreciation system under MACRS (see Publication 946).

Mining exploration and development costs. If you did not choose the *Optional Write-Off*, discussed later, recompute your regular tax deduction for mining exploration and development costs by amortizing it ratably over a 10-year period. The adjustment is the difference between the deduction claimed for regular tax and the deduction allowed for AMT.

If you have a loss for mining property, in figuring AMT, deduct all mining exploration and development costs for the property that have not been written off. A loss occurs when you abandon a worthless mine.

Circulation expenses. This adjustment is for personal holding companies only. If you did not choose the *Optional Write-Off*, discussed later, this adjustment applies. In figuring AMT, amortize circulation costs over 3 years beginning with the tax year you make the expenditures. The adjustment is the difference between the amount deducted for regular tax purposes and the amortized amount.

Adjusted gain or loss. If a corporation sold property during the year, refigure the gain or loss from the sale using the corporation's adjusted basis for AMT purposes. The following AMT adjustments require changes to the corporation's regular tax basis.

Depreciation,

Circulation expenses,

Mining exploration and development costs, and

Certified pollution control facilities.

The adjustment is the difference between the gain (or loss) reported for regular tax purposes and the recomputed gain (or loss) for AMT purposes. See *Increase or decrease*, earlier.

Long-term contracts. For any long-term contract you enter into after February 28, 1986, apply the percentage of completion method (as modified by the rules for long-term contracts under section 460(b) of the Internal Revenue Code) in determining AMT for that contract.

The adjustment is the difference between income determined using the method of accounting used for regular tax purposes and income determined using the percentage of completion method of accounting.

Home construction contracts. The rules for long-term contracts do not apply to any home construction contract you entered into in a tax year beginning after September 30, 1990, regardless of whether you meet the small home construction contract requirements.

For a construction contract not described above, determine the percentage of the contract completed using the simplified procedures for allocating costs (see section 460(b)(4) of the Internal Revenue Code).

Installment sales. For any disposition of inventory or stock in trade, the installment method of accounting does not apply for the AMT. Because of this, a corporation recognizes all gain realized on the disposition in the year of sale. The adjustment for AMT is the difference between the recognition of all gain in the year of disposition and the gain recognized under the installment method of accounting. However, this adjustment does not apply to certain dispositions of timeshares or residential lots for which you elected to pay interest.

Merchant Marine Fund. Deposits into a capital construction fund (CCF) established under section 607 of the Merchant Marine Act of 1936 are not deductible in figuring AMT. Also, the earnings (including gains and losses) on amounts in the fund are not excludable in determining AMT. The adjustment is the total of these deposits deducted or earnings excluded from income. Do not make any reduction in basis required by section 607(g) of the Merchant Marine Act of 1936 for amounts withdrawn from the fund if you included the amounts for purposes of AMT.

Section 833(b) deduction. This deduction is not allowed for AMT purposes. If a corporation

Table 2. Alternative Minimum Tax Adjustments and Preferences

Item	Description
Accelerated depreciation on property	Figure depreciation under the alternative depreciation system (ADS) of MACRS. Except for real property, you must use the 150% declining balance method. This does not apply to property described in IRC 168(f)(1) through (4).
Pollution control facilities	Figure amortization under the alternative depreciation system of MACRS.
Mining exploration and development costs	Figure amortization ratably over 10 years.
Circulation expenses (personal holding companies only)	Amortize expenses over 3 years.
Adjusted gain or loss	Refigure gain or loss on the sale of property using certain adjustments listed in this table.
Long-term contracts	Figure income for contracts entered into after 2-28-86 under the percentage of completion method (as modified by IRC 460(b)).
Installment sales	Figure income without using the installment method. This adjustment generally applies to dispositions of inventory or stock in trade.
Merchant Marine Fund	Figure income to include amounts deposited in a capital construction fund if deducted, and earnings (including gains and losses) on amounts in the fund that were excludable.
Section 833(b) deduction	Adjustment is the amount of any deduction claimed. (Applies only to certain health insurance organizations.)
Tax shelter farm activities (personal service corporations only)	Refigure all gains and losses from a tax shelter farm activity that is not a passive activity. Take into account all AMT adjustments and preferences.
Passive activity losses (closely held and personal service corporations only)	Net losses from passive activities, including tax shelter farm activities that are passive activities.
Certain loss limitations	Adjustment is any excess of the loss amount not allowable for AMT over the loss amount not allowable for regular tax purposes. If the loss amount not allowable for regular tax is more than the loss amount not allowable for AMT, the adjustment is a negative amount.
Depletion	Excess of the depletion deduction over your adjusted basis in the property.
Certain tax-exempt interest	Certain interest on specified private activity bonds.
Charitable contributions	Refigure the limit based on taxable income using the adjustments and preferences listed in this table.
Intangible drilling costs	Excess of IDCs to the extent the excess amount exceeds 65% of net income from the property. If the optional 60-month write-off was elected, IDCs are not a tax preference.
Accelerated depreciation on real property and leased personal property placed in service before 1987 (pre-ACRS and ACRS) (leased personal property; for personal holding companies only)	Excess of the depreciation or amortization taken over the amount allowable under straight line.
Other adjustments	Adjustment is for certain income reported for regular tax purposes including: 1) Income eligible for the possession tax credit, and 2) Income from the alcohol fuel credit. Also, the adjustment can be for any minimum taxable income adjustment from Schedule K-1 (Form 1041), line 8, if the corporation is the beneficiary of a trust, for an AMT adjustment from a cooperative, or for any related adjustments*.

* AMT adjustments and tax preference items may affect deductions (such as the section 179 deduction) that are based on an income limit. If so, you may have to make related adjustments. You do this by refiguring these deductions using the income limit as modified for AMT purposes.

(Blue Cross or Blue Shield or similar health insurance providers) took this deduction for regular tax purposes, the adjustment is to add back the amount deducted.

Tax shelter farm activities. This adjustment applies only to personal service corporations. Refigure all gains and losses from a tax shelter farm activity that is not a passive activity by taking into account all AMT adjustment and preference items. You do this by determining the corporation's tax shelter farm activity gain or loss for AMT using the same rules used for regular tax purposes with the following modifications:

- 1) No recomputed loss is allowed, except to the extent the personal service corporation is insolvent, and
- 2) You cannot use a recomputed loss in the current tax year to offset gains from other tax shelter farm activities. Instead, you must suspend any recomputed loss and carry it forward until either the corporation has a gain in a later tax year from the same activity or it disposes of the activity.

The adjustment is the difference between the gain or loss for AMT purposes and the amount that was reported for regular tax purposes.

To avoid duplication, do not include any AMT adjustment or preference item that is included as a gain or loss in the computation for a passive activity loss, discussed next.

A corporation is insolvent to the extent its liabilities exceed the FMV of its assets.

Passive activity loss. This adjustment applies only to closely held and personal service corporations. To determine the adjustment for a passive activity, refigure all gains and losses by taking into account the corporation's AMT adjustments, preferences, and AMT prior year unallowed losses. You do this by determining the corporation's passive activity gain or loss for AMT using the same rules used for regular tax purposes. You reduce the loss disallowed by the amount a corporation is insolvent. The adjustment is the difference between the allowable loss reported for regular tax and the refigured AMT loss.

To avoid duplication, do not include any AMT adjustment or preference item that is taken into account in this passive activity computation in the amounts to be entered on any other line of Form 4626.

Certain loss limitations. You must take into account the corporation's AMT adjustments and preferences before you apply certain loss deferral rules.

The loss deferral rules include limits on losses due to:

A partner's basis in the partnership interest, and

The at-risk limits.

The adjustment is the excess of the loss amount that is not allowable for AMT purposes over the loss amount that is not allowable for regular tax purposes. If the loss amount that is not allowable for regular tax purposes is more than the loss amount that is not allowable for AMT purposes, the difference is entered on line 2l of Form 4626 as a negative amount.

Depletion. If a corporation's depletion deduction for the year is more than its adjusted basis in the property at the end of the year (figured before reducing the basis by the depletion deduction), the difference is a preference item. You figure this item separately for each separate piece of property being depleted. Depletion figured using the small producer's and royalty owner's exemption is not a preference item.

In computing the year-end adjusted basis, do not add the unrecovered cost of machinery and other depreciable equipment to the adjusted depletable basis of mineral property. If you added these costs to the adjusted basis, deduct them before figuring the depletion preference.

Percentage depletion of coal and iron ore. Figure a corporation's (other than an S corporation's) preference for the percentage depletion of coal (including lignite) and iron ore as follows:

- 1) Subtract the corporation's basis in the property at the end of the year (before adjusting it for the year's depletion) from the year's percentage depletion on the property.
- 2) Reduce the corporation's percentage depletion by 20% of the amount figured in (1). This is the most the corporation can deduct for percentage depletion on the property.
- 3) Subtract the corporation's basis in the property (before adjusting it for the year's depletion) from the amount figured in (2). The result is the corporation's preference item for percentage depletion on the property.

Certain tax-exempt interest. This preference item is the tax-exempt interest on specified private activity bonds reduced by any deduction that would have been allowable if the interest had been included in gross income for regular tax purposes. A specified private activity bond is one issued after August 7, 1986, or, on or after September 1, 1986, for bonds satisfying pre-Tax Reform Act of 1986 definitions of governmental bonds.

For this preference item, a private activity bond does not include:

- 1) A qualified section 501(c)(3) bond, or
- 2) Any refunding bond (whether a current or advance refunding) if the refunded bond (or for a series of refundings, the original bond) was issued before August 8, 1986.

Treat any exempt-interest dividends a corporation receives from a mutual fund as interest on a specified private activity bond to the extent of its proportionate share of the interest

on the bonds received by the company paying the dividend.

Charitable contributions. Refigure the charitable contributions deduction for the AMT. Use only income and deductions allowed for the AMT when refiguring the limit based on taxable income. Also, any AMT carryover of charitable contributions is limited to the cost or other basis (instead of fair market value) for any contribution of capital gain or section 1231 property for which the preference for charitable contributions applied.

Intangible drilling costs (IDCs). If you elected the optional 60-month write-off for IDCs, discussed later, these costs are not a preference item. If you do not elect the 60-month write-off, this preference item is the amount by which excess IDCs paid or incurred during the year on a corporation's oil, gas, and geothermal properties are **more than 65%** of the net income from these properties.

Excess IDCs. These are costs incurred or paid for oil, gas, and geothermal wells over the amount allowable if the costs had been amortized using a 120-month period or any permitted cost depletion method.

Net income. Net income from oil, gas, and geothermal properties for this purpose is the gross income received or accrued from all these properties less the deductions allocated to these properties. Deductions do not include excess IDCs or costs for nonproductive wells. Nonproductive wells are those plugged and abandoned without producing oil, gas, or geothermal energy in commercial quantities for any substantial period of time. A well that is temporarily shut in is not a nonproductive well.

Special rule. Excess IDCs for any oil or gas well are a preference item only for integrated oil companies. However, if you are not an integrated oil company, the reduction in your alternative minimum taxable income (AMTI) cannot exceed 40% of your AMTI for the year figured by taking into account this item, but without regard to the alternative tax NOL deduction, discussed later, under *Other Adjustments*.

Accelerated depreciation on real property placed in service before 1987. This preference item is the depreciation or amortization a corporation took during the tax year on real property placed in service before 1987, minus straight line depreciation. Figure this amount separately for each separate item of property. Generally, each building (or its component) is a separate item of property. Do not figure this amount for an item of property you dispose of during the tax year.

For property depreciated as 15-year real property under the accelerated cost recovery system (ACRS), figure straight line depreciation using a recovery period of 15 years.

For property depreciated as 18-year real property under ACRS, figure straight line depreciation using a recovery period of 18 years.

For property depreciated as 19-year real property under ACRS, figure straight line depreciation using a recovery period of 19 years.

For low-income housing property depreciated under ACRS, figure straight line depreciation using a recovery period of 15 years.

For property a corporation placed in service between July 31, 1986, and 1987, and elected to depreciate under MACRS, see *Accelerated depreciation on property*, earlier.

If you use a recovery period longer than these periods in depreciating the property, you do not have a preference item.

For property depreciated under another method, figure straight line depreciation using the same basis, useful life, and salvage value you first used to depreciate the property. If the corporation did not use a useful life or salvage value, figure straight line depreciation as if it had taken depreciation using that method.

Accelerated depreciation on leased personal property placed in service before 1987. This preference item is the depreciation a corporation took during the tax year on personal property it leased to others minus the depreciation using the straight line method.

This item applies only if the corporation is a personal holding company.

Other adjustments. You must make an adjustment as a negative amount for certain income reported for regular tax purposes including:

- 1) Income eligible for the possession tax credit, and
- 2) Income for the alcohol fuel credit.

Also, the adjustment can be either a positive or negative amount for (a) any minimum taxable income adjustment from Schedule K-1 (Form 1041), line 8, if the corporation is the beneficiary of a trust, (b) any AMT adjustment from a cooperative, or (c) any related adjustment discussed next.

Related adjustments. AMT adjustments and preferences may affect deductions that are based on an income limit. You must refigure these deductions using the income limit as modified for AMT purposes. You include this adjustment on line 2s of Form 4626 for the total difference between the regular tax and AMT amounts for all items not taken into account on any other line on Form 4626. If the AMT deduction is more than the regular tax deduction, enter the difference as a negative amount. See the instructions for Form 4626 for more information.

Preadjustment Alternative Minimum Taxable Income (AMTI)

The adjustment and preference items just discussed result in the amount on line 3, Form 4626, called the preadjustment alternative minimum taxable income (AMTI). You are now ready to make the ACE adjustment and figure any alternative tax net operating loss deduction (ATNOLD) for AMT purposes. However, if your corporation has undergone an ownership change, see the following note before beginning your ACE adjustment.

Note: If your corporation has a net unrealized built-in loss (within the meaning of section 382(h) of the IRC), and undergoes an ownership change, you must first adjust the basis of each asset of the corporation (immediately after the ownership change). The new adjusted basis of each asset is its proportionate share (based on the respective fair market values) of the fair market value (FMV) of the corporation's assets (determined under section 382(h) of the IRC), immediately before the ownership change. To determine if your corporation has a net unrealized built-in loss, use the total adjusted basis of its assets that it used for figuring its ACE.

Adjusted Current Earnings (ACE)

You increase AMTI by 75% of any excess of the corporation's ACE for the tax year over preadjustment AMTI. Preadjustment AMTI is the corporation's AMTI for the tax year determined without the adjustment for ACE and without the alternative tax net operating loss deduction. Make a negative (reduction) adjustment for 75% of any excess preadjustment AMTI over ACE to the extent of the net positive adjustments for ACE in prior tax years.

ACE is the corporation's preadjustment AMTI for the tax year determined by taking into account certain specified adjustments. You can determine the ACE by completing the *Adjusted Current Earnings Worksheet*. This worksheet is provided in the instructions for Form 4626. The worksheet lists all of the adjustments that may affect the ACE.

Some of these adjustments are briefly discussed next.

ACE depreciation. The adjustment is the excess of AMT depreciation over ACE depreciation. If ACE depreciation exceeds AMT depreciation, the adjustment is a negative amount. The ADS system of MACRS is used for property placed in service after 1989 and before 1994. This system requires use of the straight line method over a specified recovery period. For property placed in service after December 31, 1993, the ACE depreciation expense is the same as the AMT depreciation expense discussed earlier in *Accelerated depreciation on property* under *Adjustments and Preferences*.

Inclusion in ACE of items included in earnings and profits (E & P). These are items that are not taken into account in determining the corporation's preadjustment AMTI but that are included in determining E & P. An adjustment must be made to include them in ACE. These items are listed on the *Adjusted Current Earnings Worksheet* on lines 3a through 3e.

Disallowance of items not deductible in computing E & P. These are items that are not taken into account in figuring E & P. No deduction is allowed for them when figuring ACE. These items will generally increase ACE to the extent

they were deductible in figuring the preadjustment AMTI. However, there are some exceptions to this rule discussed in the instructions for Form 4626. These items are listed on the *Adjusted Current Earnings Worksheet* on lines 4a through 4e.

Intangible drilling costs. To figure the ACE expense, capitalize and amortize these costs over a 60-month period beginning with the month you paid or incurred them. For amounts paid or incurred in tax years beginning after December 31, 1992, this adjustment does not apply to any oil or gas well except for those of integrated oil companies. Subtract the ACE expense (if any) from the AMT expense used to figure the adjustment for line 2p of Form 4626. The difference is the ACE adjustment. If the ACE expense exceeds the AMT expense, the difference is a negative adjustment. You enter any adjustment on line 5a of the worksheet.

Circulation expenses. For purposes of figuring ACE, the amortization provisions do not apply to expenses paid or incurred after 1989. You must treat the expenses in accordance with the case law in effect before the enactment of section 173 of the Internal Revenue Code (IRC). The adjustment is the result of subtracting the ACE expense (if any) from the expense claimed for regular tax purposes (or for personal holding companies, from the expense refigured for AMT purposes in figuring the adjustment for line 2d of Form 4626). If the ACE expense exceeds the regular tax expense (or AMT expense for a personal holding company), the adjustment is a negative amount. You enter any adjustment on line 5b of the worksheet.

Organizational expenses. For purposes of figuring ACE, the amortization provisions do not apply to expenses paid or incurred after 1989. All organizational expenses are capitalized and are not taken into account until the corporation is sold or otherwise disposed of. You enter any adjustment on line 5c of the worksheet.

LIFO inventory adjustments. The adjustments outlined in section 312(n)(4) of the IRC apply in computing the ACE. You enter any adjustment on line 5d of the worksheet. For more information on figuring this adjustment, see Income Tax Regulation 1.56(g)-1(f)(3).

Installment sales. For any installment sale that occurs in a tax year beginning after 1989, you figure the ACE as if the corporation did not use the installment method. However, this does not apply to the Internal Revenue Code section 453A percentage of the gain from an installment sale to which that section applies. The adjustment is the result of subtracting the installment sale income

for AMT purposes from the ACE income. If the ACE income is less than the AMT income, the adjustment is a negative amount. You enter any adjustment on line 5e of the worksheet.

Disallowance of loss on exchange of debt pools. A corporation may not recognize any loss on the exchange of any pool of debt obligations for another pool of debt obligations having substantially the same effective interest rates and maturities for purposes of ACE. The adjustment is added back to ACE to the extent the corporation recognized such a loss for regular tax purposes. You enter the adjustment on line 6 of the worksheet.

Acquisition expenses of life insurance companies for qualified foreign contracts. For purposes of computing ACE, acquisition expenses of life insurance companies for qualified foreign contracts (as defined in section 807(e)(4) of the IRC without regard to the treatment of reinsurance contract rules) must be capitalized and amortized. The adjustment is the result of subtracting the ACE expense (if any) from the expense recognized for regular tax purposes. If the ACE expense exceeds the regular tax expense, the adjustment is a negative amount. You enter the adjustment on line 7 of the worksheet.

Depletion. For purposes of ACE, you compute depletion using the cost depletion method for property placed in service in a tax year beginning after 1989. This adjustment does not apply to independent producers and royalty owners. You subtract the ACE expense (if any) from the expense refigured for AMT purposes (i.e., the preference amount entered on line 2m of Form 4626). You enter the result on line 8 of the worksheet. If the ACE expense exceeds the amount refigured for AMT purposes, you enter the result as a negative amount.

Basis adjustments for determining gain or loss from dispositions of pre-1994 property. For purposes of ACE, if a corporation disposed of property during a tax year for which it is making or has made any of the ACE adjustments described in section 56(g), you must refigure the property's adjusted basis for ACE purposes. The difference is a negative amount if:

- The ACE gain is less than the AMT gain,
- The ACE loss is more than the AMT loss, or
- You have a loss for ACE and a gain for AMT.

See the instructions to line 4 of Form 4626 for more information on the ACE computation.

Alternative Tax Net Operating Loss Deduction

The last adjustment for AMT is to figure the corporation's alternative tax net operating loss deduction (ATNOLD).

Figuring an ATNOLD after 1986. For AMT purposes, you figure a net operating loss (NOL) for a tax year beginning after 1986 in generally the same manner as for regular tax purposes, except:

- You make the AMT adjustments, under sections 56 and 58 of the IRC, to that year's NOL that you figured for regular tax purposes, and
- You reduce that year's NOL by the preference items under section 57 of the IRC, to the extent they increased the NOL for the tax year.

Carrybacks and carryovers. After making the above calculations, determine the NOL you can deduct in a carryback or carryover year. It cannot exceed 90% of the corporation's AMTI for that year figured before the NOL deduction.

You can carry the NOL back 3 years or carry it forward 15 years. This is the same as under the regular NOL rules. However, if you elect not to use the carryback of an NOL for regular tax purposes, you cannot carry it back for AMT purposes.

In years that a corporation does not have an AMT liability, you still reduce the NOL deduction. Use Form 4626 to figure AMTI even though the corporation does not have an AMT liability.

Figuring the amount of pre-1987 carryovers. The NOL carryforward from tax years beginning before 1987 that you can carry to tax years beginning after 1986 is the amount of your regular NOL carryover. Adjust the NOL carryforward if the corporation had a deferred add-on minimum tax liability for a year before 1987. See section 701(f)(2)(B) of Public Law 99-514 (10/22/86).

Optional Write-Off

A corporation can choose an optional 60-month, 3-year, or 10-year write-off of certain adjustments and preference items in figuring its regular income tax. If it does, do not consider these items as adjustments or preference items for the alternative minimum tax. A corporation may choose the following optional write-off periods.

60-month write-off. A corporation can choose to deduct intangible drilling and development costs in equal installments over a 60-month period beginning with the month the costs were paid or incurred.

3-year write-off. The cost a corporation can choose to deduct, in equal installments over a 3-year period, is the cost of increasing the circulation of a newspaper or periodical.

10-year write-off. The costs a corporation can choose to deduct in equal installments over 10 years are: mining exploration costs;

development expenses; and research and experimental expenses.

Choosing the optional write-off. Choose the optional write-off by the due date (including extensions) of the corporation's income tax return for the year for which you are making the choice. Attach a statement to the corporation's return that includes:

The corporation's name, address, and employer identification number,

The specific write-off you are choosing,

A note that states you make this choice under section 59(e) of the Internal Revenue Code, and

The year for which you make the choice and the preference item to which it applies.

You can use Form 4562 to choose the optional write-off. Once you select the optional write-off for any qualified expense, you can revoke it only with IRS consent.

Figuring Alternative Minimum Tax

After you arrive at AMTI, you figure the tax. First, you subtract an **exemption amount** from the corporation's AMTI. Next, you multiply the balance by the AMT rate of 20%. This result is the **tentative minimum tax**. Now you subtract the corporation's **regular tax liability** from the tentative minimum tax. The result is the corporation's AMT liability.

Exemption Amount

The AMT does not apply to corporations in the lower tax brackets with small amounts of adjustments or preference items. This is accomplished by subtracting the exemption amount from the corporation's AMTI before figuring the tentative minimum tax. The exemption amount phases out as the AMTI income gets higher.

The maximum exemption is \$40,000. However, you must reduce it by \$0.25 for every dollar that the corporation's AMTI exceeds \$150,000. This reduction causes the exemption to be zero when the corporation's AMTI is \$310,000 or more.

Tentative Minimum Tax

You figure the tentative minimum tax by multiplying the corporation's AMTI, minus the exemption amount, by 20%. This is the corporation's tentative minimum tax unless the corporation has an AMT foreign tax credit. If the corporation has an AMT foreign tax credit, subtract it to arrive at the tentative minimum tax.

AMT foreign tax credit. You figure a corporation's AMT foreign tax credit by first using taxable income, adjustments, and preference items from sources outside the United States. This is the corporation's AMTI from sources outside the United States. Then, using both this amount for taxable income from sources

outside the United States and the corporation's AMTI for total taxable income, compute the AMT foreign tax credit. You figure the credit on Form 1118.

Limit. The AMT foreign tax credit cannot be more than the amount on Form 4626, line 11, less 10% of the amount that would be on that line if Form 4626 were refigured using zero on line 6 and if the exception for intangible drilling costs under section 57(a)(2)(E) of the IRC does not apply. This 90% limit does not apply to certain corporations that meet the requirements of section 59(a)(2)(C) of the IRC.

Regular Tax

After you figure the corporation's tentative minimum tax, subtract its regular tax to get the AMT. Regular tax is the corporation's income tax shown on page 2, line 1, Part I, Form 1120-A; or line 3, Schedule J, Form 1120, minus any foreign tax credit or possessions tax credit (lines 4a and 4b, Schedule J, Form 1120).

Credits. If a corporation pays AMT, it will not get any tax benefit from certain credits (listed below). If a corporation has adjustments or preference items but does not pay AMT because of the exemption amount, it may or may not receive any benefit from these credits.

A corporation can only use these credits to the extent its regular tax liability exceeds its tentative minimum tax. You may apply any unused credit as a carryback or carryover under the usual rules for that credit.

The credits include the:

- Credit for fuel from a nonconventional source, and
- Qualified electric vehicle credit.

Also, the general business credit generally cannot be used to reduce AMT, except for certain parts of the credit indicated next.

Reduction of Alternative Minimum Tax

Reduce alternative minimum tax by any amounts from Form 3800, *General Business Credit*, line 34, Schedule A, and Form 8844, *Empowerment Zone Employment Credit*, line 21. To make this reduction, follow the instructions for line 9 of Schedule J, Form 1120; or line 6 of Part I, Form 1120-A.

Minimum Tax Credit

A corporation may be eligible to take a minimum tax credit against its regular income tax liability. A corporation figures a minimum tax credit based on the full AMT incurred in tax years beginning after 1989. For tax years beginning after 1986 but before 1990, a corporation figured the credit on the AMT based on deferral items.

Figuring the credit. For 1996, use Form 8827 to figure the credit and any carryforward to later years.

The corporation can qualify for the minimum tax credit if it had:

- An AMT liability in 1995,
- A minimum tax credit carryforward from 1995 to 1996, or
- A nonconventional source fuel credit, an orphan drug credit, or a qualified electric vehicle credit that was not allowed for 1995 solely because of the tentative minimum tax limit.

The credit cannot be greater than the corporation's regular tax liability for the tax year to which you carry it, less the following:

- 1) Foreign tax credit,
- 2) Possession tax credit,
- 3) Credit for fuel from nonconventional sources,
- 4) Qualified electric vehicle credit,
- 5) General business credit, and
- 6) The tentative minimum tax for the year in which you use the credit.

Reduction for canceled debt. You may have to reduce the minimum tax credit if you exclude from income a debt canceled after 1993:

- In a bankruptcy case,
- When you were insolvent, or
- That was a qualified farm debt.

You reduce the minimum tax credit available at the beginning of the tax year **following** the year in which the debt was canceled. For this purpose, complete Form 982, *Reduction of Tax Attributes Due to Discharge of Indebtedness (and Section 1082 Basis Adjustment)*, and attach it to the corporation's return for the year in which the debt was canceled.

Carryforward of credit. A corporation may carry the minimum tax credit forward (indefinitely) to reduce its regular tax liability in future years. If the corporation does not use all the credit in 1996, it carries the balance to 1997 and later tax years. If the corporation's minimum tax in later tax years results in getting an additional credit, add that credit to any carryforward balance from earlier years.

Estimated Tax

Every corporation that expects its tax to be \$500 or more must make estimated tax payments. A corporation's estimated tax is its expected tax liability (including alternative minimum tax) less its allowable tax credits.

Time and amount of deposits. If a corporation's estimated tax is \$500 or more, it deposits its estimated tax with an authorized financial institution or a Federal Reserve Bank. Use Form 8109 to make deposits. Follow the instructions in the coupon book.

If your total deposits of social security, Medicare, and withheld income taxes were more than \$50,000 in 1995, you must make electronic deposits for

all depository tax liabilities, including estimated tax, that occur after June 30, 1997. For more information, see Electronic deposit requirement under Payment of Tax, later.

Determine the due date of deposits from the table below (but see *Saturday, Sunday, or holiday*, discussed later, under *Due Date of Return*).

Deposit a corporation's estimated tax in installments by the 15th day of the following months of the corporation's tax year.

Required Installment	Month Due
1st	4th month
2nd	6th month
3rd	9th month
4th	12th month

Generally, each installment payment must equal 25% of the required annual estimated tax.

Example 1. The Penn Corporation, a calendar year taxpayer, estimates its tax will be \$40,000. The corporation deposits the estimated tax in four \$10,000 installments on April 15, June 15, September 15, and December 15.

Example 2. The Jones Company has a fiscal year beginning April 1 and ending March 31. Its estimated tax is \$12,000. It deposits \$3,000 of its estimated tax on July 15, September 15, December 15, and March 15.

How To Figure Each Payment

Use Form 1120-W to figure the corporation's estimated tax and determine the required installment to pay by the due date of each payment period. Pay enough by each due date to avoid a penalty for that period. If you do not pay enough during each payment period, the corporation may be charged a penalty even if it is due a refund when you file its tax return.

Amended estimated tax. If, after depositing the corporation's estimated tax, you determine its tax will be substantially larger or smaller than estimated, refigure the tax before the next installment to determine its remaining deposits.

If earlier installments were underpaid, the corporation may owe a penalty for underpayment of estimated tax. If that is the case, you should make an immediate catchup payment to reduce the amount of the penalty, whether caused by a change in estimate, failure to make a deposit, or a mistake. The penalty is discussed next.

Penalty

A corporation that fails to pay a correct installment of estimated tax in full by the due date may be subject to a penalty. The penalty rate applies to the period of underpayment for any installment. Figure the penalty at a rate of interest published quarterly by the IRS in the Internal Revenue Bulletin.

Figuring the underpayment. The underpayment of any installment is the required payment minus the amount paid by the due date.

The estimated tax payment required in installments is the lesser of:

- 1) 100% of the tax shown on the return for the preceding year (if the return was for a full 12 months and showed some tax), or
- 2) 100% of the tax shown for the current year (determined on the basis of actual income or annualized income).

However, a large corporation can use (1) or (2), whichever applies, only for determining its first installment in any tax year. If the installment determined under (1) is greater than that determined and paid under (2), add the difference to the next required installment. A large corporation is one with at least \$1 million of taxable income in any of the last 3 years. For this purpose, taxable income is modified to exclude net operating loss or capital loss carrybacks or carryovers.

Order of crediting payments. Credit an estimated tax payment against unpaid installments in the required order of payment.

Annualizing. If you base an installment on 100% of the current year's tax that you would owe if you annualized income, **no penalty** applies. You can estimate total income for the tax year by annualizing income. You annualize income by treating income received over a specified period in the tax year as if received at the same rate over the full 12-month year. Add any reduction in a required installment from using the annualization exception to the next required installments if not taken into account in earlier installments.

You have three sets of periods over which income may be annualized. The tax law specifies a particular set of periods for annualizing income unless you elect one of two alternative sets of periods by making an election on Form 8842. For the election to be effective, you must file Form 8842 by the due date of the first required installment. Once made, the election cannot be revoked. See the instructions for Form 8842 for more information.

Recurring seasonal income. When figuring the penalty for an underdeposit of an installment of estimated tax, there is a special rule for a corporation with recurring seasonal income. The rule applies to corporations whose taxable income for any period of 6 consecutive months has averaged 70% or more of its taxable income for the year during each of the past 3 tax years.

No penalty applies to an installment of estimated tax if the total deposits made by the installment date equals or exceeds 100% of the amount figured as follows:

- 1) Take the taxable income for all months in the tax year before the month the installment is due,
- 2) Divide the amount in (1) by the base period percentage, defined next, for those months,

- 3) Figure the tax on the amount figured in (2), and
- 4) Multiply the tax figured in (3) by the base period percentage for the filing month and all months during the tax year before the filing month.

The **base period percentage** for any period of months is the average percentage that the taxable income for the same period of months in each of the 3 preceding tax years bears to the taxable income for those 3 tax years.

Form 2220. Use Form 2220 to determine any underpayment of the corporation's estimated tax. If it appears from the Form 1120 or 1120-A that you underpaid the estimated tax, use Form 2220 to compute any penalty.

You generally do not have to file Form 2220 for the corporation because the IRS will figure any penalty and bill it. However, you must complete and attach the form to the tax return of the corporation if it:

- 1) Used the annualizing or recurring seasonal income method to determine any installment required, or
- 2) Is a large corporation computing its first required installment based on the prior year's tax.

Quick Refund of Overpayments

A corporation that overpays its estimated tax can apply on Form 4466 for a quick refund of any overpayment. File the form after the close of the corporation's tax year but before:

- 1) The 16th day of the 3rd month after the close of the tax year, and
- 2) The day the corporation files its return for that tax year.

The overpayment must be:

- 1) At least 10% of the amount estimated by the corporation on its application as its income tax liability for the tax year, and
- 2) At least \$500.

The IRS will credit or refund the overpayment within 45 days after you file the application.

Filing Requirements

Each corporation, unless specifically exempt, must file a tax return even if it had no taxable income for the year and regardless of its gross income for the tax year. The income tax return for ordinary corporations is **Form 1120**. Certain small corporations can file Form 1120-A. Corporations that normally file Form 1120 may save time if they can use Form 1120-A.

A corporation must file an income tax return unless it has dissolved. It must file even if it has stopped doing business and disposed of all its assets except for a small sum of cash retained to pay state taxes to keep its corporate charter. A corporation may also have to file a return for any year following the year in which

it dissolved if it carries on substantial activities. For example, the collection of assets or payment of obligations in the termination of its business affairs is considered substantial activity.

A corporation with no assets need not file an income tax return after it stops doing business and dissolves. This is so even if state law treats it as a corporation for certain limited purposes in winding up its affairs, such as suing or being sued. A receiver or trustee in bankruptcy ordinarily must file tax returns for a corporation in bankruptcy. However, the receiver or trustee may be relieved of this responsibility if dissolution has occurred. A corporation has dissolved if it has ceased business and has neither assets nor income.

Who Can File Form 1120-A

A corporation can use Form 1120-A to report its taxable income if it meets the following requirements:

- Its gross receipts are under \$500,000,
- Its total income is under \$500,000,
- Its total assets are under \$500,000,
- It does not have ownership in a foreign corporation,
- It does not have foreign shareholders who own, directly or indirectly, 50% or more of its stock,
- It is not a member of a controlled group,
- It is not a personal holding company,
- It is not a consolidated corporate return filer,
- It is not a corporation undergoing a dissolution or liquidation,
- It is not filing its final tax return,
- Its only dividend income (none of which represents debt-financed securities) is from domestic corporations and those dividends qualify for the 70% deduction,
- It has no nonrefundable tax credits other than the general business credit and the credit for prior-year minimum tax,
- It has no liability for interest on certain installment sales of timeshares and residential lots, or interest on deferred tax liability or installment payments of tax,
- It has no liability for interest due under the look-back method on completion of a long-term contract,
- It is not required to file Form 8621,
- It has no liability for tax on a nonqualified withdrawal from a capital construction fund,
- It is not making an election to forego the carryback period of an NOL,
- It is not electing to pay tax on gain from the sale of an intangible as described in section 197(f)(9)(B)(ii) of the Internal Revenue Code, and
- It is not an organization such as an S corporation, life or mutual insurance company, political organization, etc., required to file a specialized form such as Form 1120S, 1120-L, 1120-POL, etc.

For more information, see the instructions for Forms 1120 and 1120-A.

Amending Return

If, after filing Form 1120 or 1120-A, you have to correct an error on the return, use **Form 1120X**. File this form if you understated or overstated income, or failed to claim deductions or credits.

Due Date of Return

If a corporation figures its taxable income on a calendar year basis, file its income tax return by March 15 following the close of the tax year. If a corporation uses a fiscal year, file its return by the 15th day of the 3rd month following the close of its fiscal year.

Saturday, Sunday, or holiday. If the last day for performing any act for tax purposes, such as filing a return or making a tax payment, falls on a Saturday, Sunday, or legal holiday, you may perform the act on the next day that is not a Saturday, Sunday, or legal holiday.

Extension of time to file (Form 7004). A corporation will receive an automatic 6-month extension of time for filing its return by submitting an application for extension on Form 7004. File this form with the Internal Revenue Service Center where the corporation will file its income tax return. The IRS can terminate this extension at any time by mailing a notice of termination to the corporation. File Form 7004 by the due date of the corporation's income tax return.

Any automatic extension of time for filing a corporation income tax return will not extend the time for paying the tax due on the return. Deposit the tax on line 6 of Form 7004 using Form 8109 or the electronic funds transfer discussed under *Payment of Tax*, later.

Interest. If the tax reported on Form 7004 is less than the actual tax due, interest is charged on the difference.

Where To File

A corporation files its income tax return with the Internal Revenue Service Center serving the area for the location of the principal office for keeping its books and records. The instructions for the forms have the service center locations.

The separate income tax returns of a group of corporations located in several service center regions may be filed with the service center for the area in which the principal office of the managing corporation (that keeps all the books and records) is located.

Payment of Tax

Deposit the balance of any tax due, after estimated tax installments, by the due date of the return.

Make income tax deposits either to an authorized financial institution or a Federal Reserve Bank. Make all deposits with Form 8109 according to the instructions in the coupon book.

Electronic deposit requirement.

If your total deposits of social security, Medicare, and withheld income taxes were more than \$50,000 in 1995, you must make electronic deposits for all depository tax liabilities that occur after June 30, 1997. If you were required to deposit by electronic funds transfer in prior years, continue to do so in 1997. The Electronic Federal Tax Payment System (EFTPS) must be used to make electronic deposits. If you are required to make deposits by electronic funds transfer and you do not do so, you may be subject to a 10% penalty. Taxpayers who are not required to make electronic deposits may voluntarily participate in EFTPS. For information on EFTPS, call 1-800-945-8400 or 1-800-555-4477. (These numbers are for EFTPS information only.)

Penalties

There are several penalties that can apply to a corporation. Some of these penalties are discussed next.

Failure to file. If a corporation does not file its income tax return by the due date (including extensions), and it cannot show reasonable cause, a delinquency penalty of 5% of the tax due will apply if the delinquency is for one month or less. An additional 5% is imposed for each additional month or part of a month that the delinquency continues, not exceeding a total of 25%. The tax due is the tax liability that would be shown on a return, less credits and any tax payments made before the due date. Reduce the delinquency penalty by an amount equal to that imposed under the failure-to-pay tax penalty, discussed next.

If the return is not filed within 60 days of the due date (including extensions), the penalty for failure to file will be at least \$100 or the balance of tax due, whichever is less, unless reasonable cause is shown.

Reasonable cause. A corporation that wishes to avoid a penalty for failure to file a tax return, pay the tax, or deposit taxes must show reasonable cause. This is done by filing a statement of the facts establishing reasonable cause for the failure with the Director of the Service Center where the corporation must file the return. In addition, the statement must contain a declaration that it was made under the penalties of perjury.

Failure to pay tax. Payments made after the due date are subject to an interest charge, even if filing extensions were granted. Payments of tax, other than estimated tax, made after the due date may also be subject to a penalty of 0.5% a month or part of a month up to a maximum of 25%. In certain situations, the penalty will increase to 1% a month or part of a month up to a maximum of 25%.

Failure to deposit taxes. If a corporation deposits taxes after the due date or does not deposit the required tax, it may be charged a penalty. Deposits of tax after the due date are subject to a penalty on the underpayment. The underpayment is the excess of the required

tax deposit over the tax deposited by the due date.

Figuring the penalty. The penalty is figured by multiplying the underpayment by one of the following percentages:

- 1) 2% if deposited by the 5th day after the deposit due date,
- 2) 5% if deposited after the 5th day but by the 15th day after the deposit due date, or
- 3) 10% if deposited after the 15th day after the deposit due date.

The percentage is 15% if the tax is not deposited by the earlier of:

- 1) The day that is 10 days after the date of the first delinquency notice to the corporation, or
- 2) The day on which notice and demand for immediate payment is given.

This penalty does not apply to estimated taxes when the penalty discussed earlier under *Estimated Tax* applies.

Trust fund recovery penalty. If you are a person responsible for withholding, accounting for, or depositing or paying withholding taxes and willfully fail to do so, you can be held liable for a penalty equal to the tax not paid, plus interest. A responsible person can be an officer of a corporation, a partner, a sole proprietor, or an employee of any form of business. A trustee or agent with authority over the funds of the business can also be held responsible for the penalty.

“Willfully” in this case means voluntarily, consciously, and intentionally. Paying other expenses of the business instead of the taxes due is considered to be acting willfully.

If you are the person responsible for the collection and payment of withholding taxes, you can be subject to this penalty even if you are an officer or employee of a corporation or a member or employee of a partnership.

Other penalties. There are other civil penalties that can apply because of negligence, substantial understatement of tax, and fraud. Criminal penalties apply to willful failure to file, tax evasion, or making a false statement.

Capital Contributions and Retained Earnings

This section explains the tax treatment of contributions from shareholders and nonshareholders.

Paid-in capital. Contributions to the capital of a corporation, whether or not by shareholders, are **paid-in capital**. These contributions are not taxable to the corporation.

However, contributions to a corporation in aid of construction or any other contribution as a customer or potential customer is taxable to the corporation.

Basis. For the basis of property contributed by a shareholder, see *Issuance of Stock*, under *Forming a Corporation*, earlier.

The basis of property contributed to capital by a person other than a shareholder is zero.

If a corporation receives a cash contribution from a person other than a shareholder, reduce the basis of property acquired with the money during the 12-month period beginning on the day it received the contribution by the amount of the contribution. If the amount contributed is more than the cost of the property acquired, then reduce, but not below zero, the basis of the other properties held by the corporation on the last day of the 12-month period in the following order:

- 1) Depreciable property,
- 2) Amortizable property,
- 3) Property subject to cost depletion but not to percentage depletion, and
- 4) All other remaining properties.

Reduce the basis of property in a category to zero before going to the next category.

There may be more than one piece of property in each category. Base the reduction of the basis of each property on the ratio of the basis of each piece of property to the total bases of all property in that category. If the corporation wishes to make this adjustment in some other way, it must get IRS consent. The corporation files a request for consent with its income tax return for the tax year in which it receives the contribution.

Accumulation of retained earnings. A corporation can accumulate its earnings for a possible expansion or other bona fide business reasons. However, if a corporation allows earnings to accumulate beyond the reasonable needs of the business, it may be subject to an **accumulated earnings tax** of 39.6%. If the accumulated earnings tax applies, interest applies to an underpayment of tax from the date the corporate return was originally due, without extensions. This tax applies regardless of the number of shareholders.

Treat an accumulation of \$250,000 or less generally as within the reasonable needs of a business. However, treat an accumulation of \$150,000 or less within the reasonable needs of a business whose principal function is performing services in the fields of:

- Health,
- Law,
- Engineering,
- Architecture,
- Accounting,
- Actuarial science,
- Veterinary services,
- Performing arts, or
- Consulting.

In determining if the corporation has accumulated earnings and profits beyond its reasonable needs, value the listed and readily marketable securities owned by the corporation and

purchased with its earnings and profits at net liquidation value, not at cost.

The reasonable needs of the business include:

Specific, definite, and feasible plans for use of the earnings accumulation in the business; and

The amount necessary to redeem the corporation's stock included in a deceased shareholder's gross estate, if the amount does not exceed the reasonably anticipated total estate and inheritance taxes, and funeral and administration expenses incurred by the shareholder's estate.

If a corporation with accumulated earnings of more than \$250,000 does not make regular distributions to its shareholders, it should be prepared to show a bona fide business reason for not doing so.

For a corporation to avoid liability for accumulated earnings tax, it must show that tax avoidance by its shareholders is not one of the purposes of the accumulation. The simple existence of a tax avoidance purpose is sufficient for imposing the accumulated earnings tax.

Reconciliation Statements

When you file Form 1120, you must complete Schedules M-1 and M-2 if the total assets of the corporation are at least \$25,000. If you file Form 1120-A you must complete Part IV if the total assets of the corporation are at least \$25,000.

Schedule M-1. Schedule M-1 starts with the net income (loss) per books. This amount is after allowance of federal income tax accrued for the year for which the return is being filed, as shown in the corporation's profit and loss account. Schedule M-1 provides for necessary adjustments to reconcile this amount with the taxable income shown on Form 1120, line 28, page 1.

Part IV. Part IV, Form 1120-A is similar to Schedule M-1 on Form 1120. It reconciles the income per books with the taxable income on line 24, page 1 of Form 1120-A.

Schedule M-2. Schedule M-2 analyzes the unappropriated retained earnings as shown in the corporation's balance sheet, Schedule L.

To complete these schedules, you must first get additional information from your corporation's books and records.

Example. The following profit and loss account appeared in the books of the Welldon Corporation for calendar year 1996. It files

Form 1120 and completes Schedules M-1 and M-2, as illustrated later.

Account	Debit	Credit
Gross sales.....		\$1,840,000
Sales returns and allowances.....	\$ 20,000	
Cost of goods sold.....	1,520,000	
Interest		
Income from:		
Banks.....	\$10,000	
Tax-exempt state bonds.....	5,000	15,000
Proceeds from life insurance (death of corporate officer)....		6,000
Bad debt recoveries (no tax deduction claimed).....		3,500
Insurance premiums on lives of corporate officers (corporation is beneficiary of policies).....	9,500	
Compensation of officers.....	40,000	
Salaries and wages.....	28,000	
Repairs.....	800	
Taxes.....	10,000	
Contributions:		
Deductible.....	\$23,000	
Other.....	500	23,500
Interest paid (loan to purchase tax-exempt bonds).....	850	
Depreciation.....	5,200	
Loss on securities.....	3,600	
Net income per books after federal income tax.....	140,825	
Federal income tax accrued for 1996.....	62,225	
Total	\$1,864,500	\$1,864,500

The corporation analyzed the retained earnings and the following appeared in this account on its books:

Item	Debit	Credit
Balance, January 1, 1996.....		\$225,000
Net profit (before federal income tax).....		203,050
Reserve for contingencies	\$ 10,000	
Income tax accrued for 1996.....	62,225	
Dividends paid during 1996	140,089	
Refund of 1993 income tax		18,000
Balance, December 31, 1996.....	233,736	
Total	\$446,050	\$446,050

The following appears on page 1 of Form 1120:

Gross sales (\$1,840,000 less returns and allowances of \$20,000)	\$1,820,000
Cost of goods sold	<u>1,520,000</u>
Gross profit from sales	\$ 300,000
Interest income	<u>10,000</u>
Total income	\$ 310,000

Deductions:	
Compensation of officers	\$40,000
Salaries and wages	28,000
Repairs	800
Taxes	10,000
Contributions (maximum allowable)	22,500
Depreciation	<u>6,200</u>
Total deductions	107,500
Taxable income	<u>\$ 202,500</u>

Schedule M-1

Line 1. \$140,825 is the net income per books. It is shown in the profit and loss account previously as net income per books after federal income tax.

Line 2. \$62,225 is the federal income tax accrued for the tax year.

Line 3. \$3,600 is the excess of capital losses over capital gains. The net loss is from the sale of securities.

Line 4. Line 4 would show all income and credits included in taxable income but not recorded in the corporation's books. This can occur if the corporation valued assets on its books at an amount greater than that used for tax purposes. When it has a sale of these assets, the gain included in taxable income is greater than that recorded in the books. It shows the difference on this line.

Line 5. The corporation shows expenses recorded on its books that it does not deduct on this return. The \$500 listed on line 5b is for contributions that were over the 10% limit. The corporation itemizes the remaining non-deductible expenses on a statement attached to the return. These include the following:

Insurance premiums on lives of corporate officers (corporation is beneficiary)	\$ 9,500
Nondeductible interest incurred to purchase tax-exempt bonds	850
Nondeductible contributions	<u>500</u>
Total	<u>\$10,850</u>

Line 6. This is the total of lines 1 through 5.

Line 7. The corporation shows income recorded on its books during the year that it does not include on the return because the income is not taxable. This totals \$14,500 and includes interest on tax-exempt state bonds of \$5,000, insurance proceeds of \$6,000, and a bad debt recovery of \$3,500.

Line 8. Line 8 shows the total of all tax deductions on the return not charged against book

income. The corporation enters \$1,000 on line 8a. It represents the difference between the depreciation claimed on the corporation's income tax return and its books. If the corporation had other deductions to itemize on this line and there was not enough space, it would attach a statement to the return listing them.

Line 9. This is the total of lines 7 and 8.

Line 10. \$202,500 is the difference between lines 6 and 9. The amount on line 10 must agree with the taxable income before the net operating loss deduction and special deductions shown on line 28, page 1, Form 1120.

Schedule M-2

Line 1. \$225,000 is from Schedule L for the beginning of the tax return year.

Line 2. \$140,825 is the net income per books (after federal income tax).

Line 3. \$18,000 is the refund of 1993 income tax. Show all other increases to retained earnings on this line.

Line 4. This is the total of lines 1, 2, and 3.

Line 5. \$140,089 is the distributions to shareholders charged to retained earnings during the tax year.

Line 6. Line 6 is for any decreases (other than those on line 5) in unappropriated retained earnings. These decreases are not deductible on the tax return at the time of appropriation. However, a deduction may be allowable on a later return. A common example of this is an amount set aside for contingencies. A customer was injured on company property during 1996 and the company retained an attorney. The company set up a contingent liability of \$10,000 for the customer's claim. If they settle the claim during 1997 for \$5,000 and the attorney's fee is \$2,500, the company charges \$7,500 to retained earnings (appropriated). It deducts \$7,500 in arriving at taxable income for 1997. Another common example of items entered on this line is the payment of the prior years' federal tax. Attach a schedule to the return listing all items taken into account to arrive at the amount shown on this line.

Line 7. This is the total of lines 5 and 6.

Line 8. \$233,736 is the corporation's retained earnings at the end of its tax year. Determine this amount by subtracting the total on line 7 from the total on line 4. This amount must agree with the amount on Schedule L for the end of the return year.

Earnings and Profits Computations

In determining the taxable status of corporate distributions to shareholders, it is necessary to know the corporation's earnings and profits. See *Taxable Status of Distribution under Distributions*, later.

Taxable distributions come first from current earnings and profits and then from accumulated earnings and profits. Accumulated earnings and profits means earnings and profits accumulated since February 28, 1913. To the extent that the distributions are more than both the current and accumulated earnings and profits, the distributions may be partly or completely not taxable.

If the distributions are either partly or completely not taxable because they exceed current and accumulated earnings and profits, the corporation attaches Form 5452 to its income tax return. See the instructions to Form 5452 for more information. With Form 5452, you will need to attach computations of current and accumulated earnings and profits along with schedules reconciling earnings and profits with taxable income and retained earnings. One format for showing the computation of current year earnings and profits is shown earlier.

Example. In addition to the facts set out earlier, the Welldon Corporation incorporated on January 1, 1946, and uses an accrual method of accounting. Its accumulated earnings and profits as of December 31, 1995, were \$1,200. It made cash distributions during its 1996 calendar tax year of \$140,089. This consisted of \$85,089 to preferred shareholders and \$55,000 to common shareholders. The entire distribution to preferred shareholders is a taxable dividend. The \$27,500 distribution on March 15, 1996, to common shareholders is a taxable dividend to the extent of \$27,318 (99.33%), and the \$27,500 distribution on September 16, 1996, to common shareholders is a taxable dividend to the extent of \$26,118 (94.97%). The balance of retained earnings in Schedule M-2 as of December 31, 1996, is \$233,736, but earnings and profits has a zero balance.

Explanation of Items in Table 3 of the Example

A) Retained earnings will generally differ from accumulated earnings and profits because of differences in computing book and tax earnings. See item (X), below.

B) Use taxable income (before the special deductions) as the starting point for figuring current-year earnings and profits.

C) Taxes accrued for book income may differ from the amount of the actual federal income tax liability. In this case, earnings and profits reflect only the latter amount.

D) Capital losses are allowable in the year incurred, but must be added back in the tax year they are applied against gains to prevent a double deduction.

E) Excess contributions, like excess capital losses, are allowable in the year made and added back in the year deducted.

F) Since only the premium in excess of the cash surrender value represents an expense to the corporation, only that amount reduces earnings and profits.

G) Nondeductible interest expenses are expenses of the corporation that reduce earnings and profits.

Schedule M-1 Reconciliation of Income (Loss) per Books With Income per Return (See page 16 of instructions.)

1	Net income (loss) per books	140,825	7	Income recorded on books this year not included on this return (itemize):	
2	Federal income tax	62,225		Tax-exempt interest \$	5,000
3	Excess of capital losses over capital gains	3,600		Insurance proceeds	6,000
4	Income subject to tax not recorded on books this year (itemize):			Bad debt recovery	3,500
					14,500
5	Expenses recorded on books this year not deducted on this return (itemize):		8	Deductions on this return not charged against book income this year (itemize):	
a	Depreciation		a	Depreciation	\$1,000
b	Contributions carryover	\$ 500	b	Contributions carryover	\$
c	Travel and entertainment				
	See attached itemized statement (not shown) \$10,850	11,350			1,000
6	Add lines 1 through 5	218,000	9	Add lines 7 and 8	15,500
			10	Income (line 28, page 1)—line 6 less line 9	202,500

Schedule M-2 Analysis of Unappropriated Retained Earnings per Books (Line 25, Schedule L)

1	Balance at beginning of year	225,000	5	Distributions:	
2	Net income (loss) per books	140,825	a	Cash	140,089
3	Other increases (itemize):		b	Stock	
	Refund—1993 income tax		c	Property	
			6	Other decreases (itemize):	
		18,000		Reserve for contingencies	10,000
4	Add lines 1, 2, and 3	383,825	7	Add lines 5 and 6	150,089
			8	Balance at end of year (line 4 less line 7)	233,736

Printed on recycled paper.

H) Nondeductible contributions — same treatment as item (G).

I) Sum of items (E) through (H).

J) Add tax-exempt interest income to earnings and profits because it is income to the corporation.

K) Insurance proceeds (in excess of cash surrender value) — same treatment as item (J).

L) Recovery of a debt written off on the books but not deducted on tax return.

M) Sum of items (J), (K), and (L).

N) Depreciation claimed on the tax return over the straight line amount increases current earnings and profits.

Note: For tangible property depreciated under MACRS, the adjustment to earnings and profits for depreciation is the amount figured using the alternative depreciation system (ADS) of MACRS. If you take a section 179 deduction, for purposes of figuring earnings and profits, you can only deduct the section 179 amount that is figured ratably over a 5-year period. The 5-year period begins with the tax year you take the section 179 deduction. See Publication 946 for more information on MACRS and the section 179 deduction.

O) The refund represents a reduction of the corporation's 1993 income tax and affects the earnings and profits of a prior year.

P) This amount represents the difference between the corporation's book and tax basis of its reserve for contingencies. It will not affect earnings and profits until the corporation can deduct it in computing taxable income.

Q) Preferred shareholders, in this case, have a right to current-year earnings and profits before common shareholders.

R) Allocable share of remaining current-year earnings and profits.

S) Distributions that are more than the current-year earnings and profits reduce accumulated earnings and profits.

T) Distributions that are more than earnings and profits and that represent dividends that are not taxable to shareholders reduce the corporation's capital.

U) Same as item (R).

V) Same as item (T).

W) Sum of items (Q) through (V).

X) Represents the sum of the current year differences (keyed as x) between figuring the corporation's book and tax earnings. These items plus items (O) and (S) account for the total current-year change of \$8,736.

Y) Represents the accumulated differences between the corporation's book earnings and accumulated tax earnings.

For more information, see Revenue Procedure 75-17 in Cumulative Bulletin 1975-1 on page 677. You can get a copy of this revenue procedure from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

Distributions

This section discusses corporate distributions to shareholders. These distributions may be ordinary dividends, stock dividends, or a return of capital. It discusses distributions in property, as well as distributions in money. This discussion generally applies only to regular domestic corporations.

Any distribution to shareholders from earnings and profits is generally a *dividend*. However, a distribution is not a taxable dividend if it is a return of capital to the shareholder. Most distributions are in money, but they may also be in stock or other property. For information on shareholder reporting of dividends and

other distributions, see Publication 550, *Investment Income and Expenses*.

File a Form 1099-DIV with IRS for each shareholder to whom a corporation pays gross dividends of \$10 or more during a calendar year. The corporation files Form 1096 to summarize and transmit its Forms 1099-DIV. File Form 5452 if the corporation pays dividends that are not taxable.

The corporation may furnish Forms 1099-DIV to shareholders after November 30 of the year of payment (but not before the final payment for the year). However, it may furnish this statement to shareholders after April 30 of the year of payment if furnished with the final dividend for that calendar year. This information must be furnished by January 31 of the year following the close of the calendar year during which the corporation makes the payments.

Withholding on dividends. Backup withholding may require a corporation to withhold tax equal to 31% of the dividends paid to certain shareholders. Backup withholding is not required for dividend payments of less than \$10. However, file Form 1099-DIV if there is backup withholding, regardless of the amount of the dividend. See Publication 505 for more information on backup withholding.

Amount of Distribution

The amount of a distribution paid to any shareholder is the money paid plus the FMV (on the distribution date) of other property transferred to the shareholder. Reduce (but not below zero) the distribution by liabilities of the corporation assumed by the shareholder and by liabilities to which the property is subject.

The basis of property received by the shareholder is its FMV, defined earlier.

Table 3. Welldon Corporation Current-Year Computation of Earnings and Profits Calendar Tax Year 1996

Incorporated 1/1/46 Accrual Accounting Basis	Schedule M Per Return			Earnings and Profits Current-Year Accumulated			
		DR (Debit)	CR (Credit)	DR (Debit)	CR (Credit)	CR BAL	KEY

KEY SYSTEM

* Identical items on the same list in Schedule M and Earnings and Profits.

(Alphabet) Items completely offset in same year. Start with (a) each year.

(Dates) Items which as of the final balance sheet's date have been completely offset in various years. Use consecutive dates to show the years for locating offsets.

(x) Items which have not been completely offset and are differences between Schedule M and Earnings and Profits.

Property. Property means any property including money, securities, and indebtedness to the corporation, except stock of the distributing corporation or rights to acquire this stock.

Transfers of property to shareholders for less than FMV. A sale or exchange of property between a corporation and a shareholder that is not a corporation may be a distribution to the shareholder.

If the FMV of the property on the date of the sale or exchange exceeds the price paid by the shareholder, the excess is a distribution.

Corporation canceling shareholder's debt. If a corporation cancels a shareholder's debt without repayment by the shareholder, treat the amount canceled as a distribution to the shareholder.

Distributions of Appreciated Property

The distributing corporation generally does not recognize gain or loss on a distribution (not in complete liquidation) of property to its shareholders.

However, if a corporation distributes property, other than its own obligations, to a shareholder and the property's FMV exceeds the corporation's adjusted basis, treat the property as sold at the time of distribution. The corporation recognizes gain on the excess of the FMV over the adjusted basis of the property.

Distributions of depreciated property. If the FMV of depreciated property distributed to shareholders is more than the adjusted basis of that property, the corporation must report ordinary income because of depreciation. This applies even though the distribution, either as a dividend or in liquidation, might otherwise be not taxable.

Taxable Status of Distribution

The part of a distribution from either current or accumulated earnings and profits is a dividend. First, the part of the distribution that is more than earnings and profits reduces the adjusted basis of the stock in the hands of the shareholder. Second, any amount that exceeds the adjusted basis of that stock is treated by the shareholder as gain from the sale or exchange of property (usually capital gain).

Whether a distribution is a taxable dividend to the shareholders, used to reduce the adjusted basis of their stock, or treated as gain from the sale of property, depends upon whether the distribution is more than:

- 1) Earnings and profits for the tax year of the distribution (figured as of the close of that year without reduction for any distribution during the year), plus
- 2) Accumulated earnings and profits since February 28, 1913.

The current earnings and profits at the time of distribution do not necessarily determine whether the distribution is a taxable dividend.

If there is a deficit in earnings and profits for the tax year of the distribution, the taxable status of the distribution depends on the amount of accumulated earnings and profits. In determining accumulated earnings and profits, prorate the deficit in earnings and profits for the current year to the dates of distribution.

Example 1. X, a calendar year corporation, had accumulated earnings and profits of \$40,000 as of January 1, 1996, the beginning of its tax year. X had an operating loss of \$50,000 for the first 6 months of 1996, but had earnings and profits of \$5,000 for all of 1996. X distributed \$15,000 to its shareholders on July 1, 1996.

The entire distribution is an ordinary dividend. Consider \$5,000 as paid from 1996 earnings and profits and \$10,000 as paid from accumulated earnings and profits.

Example 2. Assume the same facts as in Example 1, except that X had a deficit in earnings and profits (E & P) of \$55,000 for 1996. To figure the available earnings and profits, prorate the deficit to the date of the distribution as follows:

Accumulated E & P — 1/1/96	\$ 40,000
E & P deficit for 1996 prorated to the date of distribution — 7/1/96 (1/2 × \$55,000)	(27,500)
E & P available — 7/1/96	\$ 12,500
Distribution — 7/1/96 — taxable dividend	(12,500)
E & P deficit — 7/1 — 12/31/96	(27,500)
Accumulated E & P — 12/31/96	<u>\$ (27,500)</u>

This computation shows that the accumulated earnings and profits available at the time of distribution was \$12,500. Of the \$15,000 distribution, only \$12,500 is a taxable dividend. The balance of the distribution, \$2,500, reduces the adjusted basis of the stock in the hands of the shareholders. To the extent that the \$2,500 balance is more than the adjusted basis of their stock, the shareholders have a gain from the sale or exchange of property.

Nontaxable dividends. Nontaxable dividends are distributions to shareholders on their stock in the ordinary course of business. They are not taxable as dividends because the amount of the distributions is greater than the corporation's earnings and profits. Attach Form 5452 to the corporate return if nontaxable dividends are paid to shareholders. Tax-free stock dividends and distributions in exchange for stock in liquidations or redemptions are not nontaxable dividends.

Adjustment to Earnings and Profits

For a cash distribution, decrease the current earnings and profits by the amount distributed, but not below zero.

For a distribution of an obligation of the distributing corporation, decrease the earnings

and profits by the principal amount of that obligation, but not below zero.

For the distribution of an original issue discount obligation, decrease earnings and profits by the total issue price of the obligation, but not below zero.

For a distribution of other property, decrease the earnings and profits by the adjusted basis of that property, but not below zero.

However, for a distribution of appreciated property (other than the corporation's obligations), increase the earnings and profits by the excess of the FMV over the adjusted basis of the property. Decrease them, but not below zero, by the FMV of the appreciated property and also by the FMV (instead of adjusted basis) of other property distributed under the general rule of the preceding paragraph.

Also, the decrease in earnings and profits by the FMV of distributed property in the preceding paragraph is reduced for any liability to which the distributed property is subject and any liability assumed by the shareholder in connection with the distribution.

Distribution of Stock and Stock Rights

A shareholder does not include a distribution of stock or rights to acquire stock in your corporation in gross income unless it is one of the following:

- 1) A distribution instead of money or other property,
- 2) A disproportionate distribution,
- 3) A distribution on preferred stock,
- 4) A distribution of convertible preferred stock, unless your corporation can establish to the satisfaction of the IRS that the distribution will not result in a disproportionate distribution, or
- 5) A distribution of common and preferred stock resulting in the receipt of preferred stock by some common shareholders and receipt of common stock by other common shareholders.

Even if the distribution falls into one of these five categories, there must be sufficient earnings and profits for the distribution to be a dividend. If the distribution does not fall into one of these categories, the corporation does not adjust its earnings and profits.

A distribution is instead of money or other property if any shareholders have an election to get either stock, rights to acquire stock, money, or property. This applies regardless of whether:

- 1) The distribution is actually made in whole or in part in stock or in stock rights,
- 2) The election or option is exercised or exercisable before or after the declaration of the distribution,
- 3) The declaration of the distribution provides that it will be made in one type unless the shareholder specifically requests payment in the other,

- 4) The election governing the nature of the distribution is provided in the declaration of the distribution, corporate charter, or arises from the circumstances of the distribution, or
- 5) All or part of the shareholders have the election.

If the common shareholders receive a pro rata distribution of preferred stock with an option to immediately redeem it for money, the distribution is instead of money. They include the distribution in gross income.

A **distribution is disproportionate** if some shareholders receive cash or other property and other shareholders receive increased proportionate interests in the assets or earnings and profits of the corporation. However, it is not required that shareholders receive the cash or property by means of a distribution or series of distributions as long as the result is that they did receive it in their capacity as shareholders and that this distribution is one which would be subject to the rules that apply to the taxing of dividends.

For a distribution of stock to be considered as one of a series of distributions, it is not necessary that it be pursuant to a plan to distribute cash or property to some shareholders and to increase the proportionate interests of other shareholders. It is sufficient if there is either an actual or deemed distribution of stock and as a result of it, some shareholders receive cash or property and other shareholders increase their proportionate interests.

Example. Your corporation has two classes of common stock outstanding. If it pays regular cash dividends on one class of stock and stock dividends on the other class of stock (whether in common or preferred stock), there is a disproportionate distribution. The stock dividends are distributions of property that may be ordinary dividends.

If there is more than one class of stock outstanding, you must consider each class of stock separately for determining whether a shareholder has increased his or her proportionate interest in the assets or earnings and profits of a corporation.

In determining whether a distribution or series of distributions has the result of a disproportionate distribution, treat any security convertible into stock (whether or not convertible during the tax year) or a right to acquire stock (whether or not exercisable during the tax year) as outstanding stock.

If certain transactions increase a shareholder's proportionate interest in the earnings and profits or assets of the corporation, treat them as distributions of stock. These interest changes include:

- A change in the conversion ratio,
- A change in redemption price,
- A difference between redemption price and issue price,
- A redemption treated as a dividend distribution, or
- Any transaction (including a recapitalization) having a similar effect on the interest of any shareholder.

You cannot deduct the expenses of issuing a stock dividend. These include printing, postage, cost of advice sheets, fees paid to transfer agents, and fees for listing on stock exchanges. Capitalize these costs.

Constructive Dividends—Insurance Premiums

If a corporation pays part or all of the premiums on insurance issued on the lives of certain shareholders and both the corporation and shareholders derive benefits from it, part or all of the premiums paid by the corporation is a constructive dividend. This is especially true in a closely held corporation.

Sample Returns

Form 1120-A (Short-Form)

Rose Flower Shop, Inc., is the corporation for which this sample return is filled out. Rose Flower Shop operates a business that sells fresh cut flowers and plants. It uses an accrual method of accounting and files its returns on the calendar year.

A corporation can file Form 1120-A if it has gross receipts under \$500,000, total income under \$500,000, total assets under \$500,000, and meets certain other requirements. Since Rose Flower Shop met all these requirements for 1996, it filed Form 1120-A.

Page 1

When you prepare your return, use the pre-addressed label sent to you by the IRS. It is designed to expedite processing and prevent errors. If you do not have a pre-addressed label, enter your corporation's name, street address, city, state, ZIP code, and employer identification number in the appropriate spaces on the first page.

Show the name and employer identification number of the corporation in the top margin of schedules and attachments to Form 1120-A.

Fill in the items of income, deduction, tax, and payments listed on page 1 that apply to the business. Do not alter, substitute for, or cross out the line captions on the return forms.

Line 1. Gross sales, line 1a, for the year totaled \$248,000 using an accrual method of accounting. After subtracting returned goods and allowances of \$7,500, line 1c shows net sales of \$240,500.

Line 2. Cost of goods sold is \$144,000. Figure this using the worksheet (not illustrated) in the form instructions.

Line 3. Net sales less cost of goods sold results in a gross profit of \$96,500.

Lines 4 through 10. Other items of income are next. During the year, the only other item of income was taxable interest of \$942, shown on line 5.

Line 11. Total income is \$97,442.

Line 12. The \$23,000 is the salary of the company president.

Line 13. Other salaries and wages of \$24,320 are entered here. This includes only salaries and wages neither included on line 12 nor deducted as part of cost of goods sold on line 2.

Line 16. Rent for Rose Flower Shop's store was \$6,000 for the year.

Line 17. Deductible taxes totaled \$3,320.

Line 18. Interest expense accrued during the year was \$1,340. This includes interest both on debts for business operations and debts to carry investments. It does not include interest to carry tax-exempt securities. See chapter 8 of Publication 535 for a discussion of deductible interest.

Line 19. During the year, Rose Flower Shop contributed \$1,820 to various charitable organizations. The \$1,820 is less than the limit for deductible contributions, which is 10% of taxable income figured without the contribution deduction and special deductions entered on line 25b.

Line 22. Other business deductions consist of \$3,000 for advertising. If there had been several expenses included in the total, Rose Flower Shop would have to prepare and attach a supporting schedule.

Line 23. Total of lines 12 through 22 is \$62,800.

Lines 24, 25, and 26. Taxable income, before the net operating loss deduction and special deductions, on line 24 is \$34,642. Since Rose Flower Shop did not have a net operating loss or special deduction, the same amount is shown on line 26.

Tax summary. Rose Flower Shop enters on line 27 the total tax (\$5,196) from Part I, line 7, page 2. It lists payments that can be applied against the tax on line 28. The only payments on the Rose Flower Shop return are four estimated tax deposits totaling \$6,000. Enter this amount on lines 28b, 28d, and 28h. The resulting overpayment is \$804, which Rose Flower Shop chooses to have credited to its 1997 estimated tax. Rose Flower Shop could have the overpayment refunded.

Signature. An authorized corporate officer must manually sign the return.

Page 2

Part I—Tax Computation. Use the tax rate schedule in the form instructions to figure the tax on line 1. Lines 3, 5, and 6, the other taxes and credits listed on Part I, do not apply to Rose Flower Shop. The tax of \$5,196 is entered on lines 1, 4, and 7.

Part II—Other Information. Answer all questions that apply to your business. Provide the

business activity code number, business activity, and product or service information on lines (a), (b), and (c) of question 1. The business activity codes are provided in the instructions for Forms 1120 and 1120-A. Purchases of \$134,014 appear on line (1) of question 5a. Other costs of \$9,466 appear on line (3) of question 5a. The supporting itemization is not illustrated. These costs consist of costs directly related to the sale of flowers, wreaths, and plants, such as flower pots, vases, stands, boxes, and tissue paper.

Part III—Balance Sheets. Provide comparative balance sheets for the beginning and end of the tax year. Entries in Part III should agree with amounts shown elsewhere on the return or included on a worksheet. For example, the figures for beginning and ending inventories must be the same as those appearing on the worksheet in the form instructions for cost of goods sold.

Part IV—Reconciliation of Income (Loss) per Books With Income per Return. All Form 1120-A corporate filers must complete Part IV unless total assets on line 12, column (b) of Part III are less than \$25,000. Since total assets of Rose Flower Shop exceed this amount, it completes Part IV.

To properly complete Part IV, you need additional information from the corporation's books and records. The following profit and loss account appeared in the books of Rose Flower Shop for the calendar year 1996.

Account	Debit	Credit
Gross sales.....		\$248,000
Sales returns and allowances.....	\$ 7,500	
Cost of goods sold.....	144,000	
Interest income.....		942
Compensation of officers.....	23,000	
Salaries and wages.....	24,320	
Rents.....	6,000	
Taxes.....	3,320	
Interest expense.....	1,340	
Contributions.....	1,820	
Advertising.....	3,000	
Federal income tax accrued	5,196	
Net income per books after tax.....	29,446	
Total	<u>\$248,942</u>	<u>\$248,942</u>

Part IV starts with the net income (loss) per books, after reduction for federal income tax accrued, as shown in the corporation's profit and loss account. It provides for necessary adjustments to reconcile this amount with the taxable income shown on line 24, page 1.

Line 1. \$29,446 is the net income per books. It appears in the profit and loss account as net income per books after tax.

Line 2. \$5,196 is the federal income tax accrued for the tax year.

Line 8. \$34,642 is the taxable income on line 24, page 1.

Form 1120

Tentex Toys, Inc., is the corporation for which this sample return is filled out. Tentex manufactures and sells children's toys and games. It uses an accrual method of accounting and files its returns on the calendar year.

Page 1

When you prepare your return use the pre-addressed label sent to you by the IRS. It is designed to expedite processing and prevent errors. If you do not have a pre-addressed label, enter your corporation's name, street address, city, state, ZIP code, and employer identification number in the appropriate spaces on the first page.

Show the name and employer identification number of the corporation in the top margin of schedules and attachments to Form 1120.

Fill in the items of income, deduction, tax, and payments listed on page 1 that apply to the business. Do not alter, substitute for, or cross out the line captions on the return forms.

Line 1. Gross sales, line 1a, for the year totaled \$2,010,000 using an accrual method of accounting. After subtracting returned goods and allowances of \$20,000, line 1c shows net sales of \$1,990,000.

Line 2. Cost of goods sold is \$1,520,000. This is the total from Schedule A (line 8) on page 2.

Line 3. Net sales less cost of goods sold results in gross profit of \$470,000.

Lines 4 through 10. Enter other items of income next. During the year, Tentex received \$10,000 of dividends from domestic corporations, \$5,000 of tax-exempt interest from state bonds, and \$4,000 of taxable interest. It also received \$1,500 interest on its business accounts receivable. Enter the gross amount of dividends on line 4 (you take the dividends-received deduction on line 29b). Line 5 shows total taxable interest of \$5,500. Do not include tax-exempt interest in income.

Line 11. Total income is \$485,500.

Line 12. Enter the salaries of \$70,000 paid to company officers listed on Schedule E. Complete Schedule E because total receipts (line 1a plus lines 4 through 10 of page 1) exceed \$500,000.

Line 13. Enter other salaries and wages of \$38,000. This includes only salaries and wages neither included on line 12 nor deducted as part of cost of goods sold on line 2. For a manufacturing company such as Tentex, this amount represents nonmanufacturing salaries and wages, such as office salaries. See chapter 2 of Publication 535 for a discussion of salaries and wages.

Tentex is eligible for a \$6,000 work opportunity credit figured on Form 5884 (not illustrated). You reduce the total amount of other salaries and wages, \$44,000, by the \$6,000 credit that is included on line 4d, Schedule J.

Only the balance, \$38,000, is shown on line 13.

Note: The work opportunity credit replaces the targeted jobs credit as an incentive to hire persons from groups with a particularly high unemployment rate or other special employment needs. The work opportunity credit applies to wages you pay to a certified member of a targeted group who begins work for you after September 30, 1996, and before October 1, 1997. For more information, see Form 5884.

Line 14. Repairs include only payments for items that do not add to the value of the assets repaired or substantially increase their useful lives. Repairs total \$800. See chapter 16 of Publication 535 for information on repairs, improvements, and replacements.

Line 15. Tentex uses the specific charge-off method of accounting for bad debts. Actual accounts written off during the year total \$1,600. See chapter 14 of Publication 535 for information on bad debt deductions.

Line 16. Rent for Tentex's office facilities was \$9,200 for the year.

Line 17. Deductible taxes totaled \$15,000.

Line 18. Interest expense accrued during the year was \$27,200. This includes interest both on debts for business operations and debts to carry investments. It does not include interest to carry tax-exempt securities. See chapter 8 of Publication 535 for a discussion of deductible interest.

Line 19. During the year, Tentex contributed \$11,400 to the United Community Fund and \$12,600 to the State University Scholarship Fund. The total, \$24,000, is more than the limit for deductible contributions, which is 10% of taxable income figured without the contribution deduction and special deductions entered on line 29b. The amount allowable on line 19 is \$23,150. The excess, \$850, not deductible this year, can be carried over to a later year, as explained earlier under *Charitable Contributions*. Also, during the year, Tentex made non-deductible contributions of \$500.

Lines 20 and 21. Depreciation from Form 4562 (not illustrated) is \$17,600. Enter it on line 20. Reduce this amount by the depreciation (\$12,400) included in the amount claimed on line 5 of Schedule A and enter it on line 21a. Deduct the balance of \$5,200 on line 21b since it is the depreciation on the assets used in the indirect operations of the business.

Line 22. Tentex does not have a depletion deduction. For information on depletion, see chapter 13 of Publication 535.

Line 23. Advertising expense was \$8,700.

U.S. Corporation Short-Form Income Tax Return

1996

Part IV Reconciliation of Income (Loss) per Books With Income per Return (You are not required to complete Part IV if the total assets on line 12, column (b), Part III are less than \$25,000.)

1	Net income (loss) per books	29,446	5	Income recorded on books this year not included on this return (itemize)	
2	Federal income tax	5,196	6	Income (line 24, page 1). Enter the sum of lines 1 through 5 less the sum of lines 6 and 7	34,642
3	Excess of capital losses over capital gains		7	Deductions on this return not charged against book income this year (itemize)	
4	Income subject to tax not recorded on books this year (itemize)				
5	Expenses recorded on books this year not deducted on this return (itemize)				

Lines 24 and 25. Tentex does not have a profit-sharing, stock bonus, pension, or annuity plan. For information on retirement plans, see chapter 6 of Publication 535.

Line 26. Other business deductions total \$78,300. This includes miscellaneous office expenses, sales commissions, legal fees, etc. Attach a schedule that itemizes these expenses to the return. This example does not show the supporting itemization.

Line 27. Total of lines 12 through 26 is \$277,150.

Lines 28, 29, and 30. Taxable income before the net operating loss deduction and special deductions on line 28 is \$208,350. Since Tentex did not have a net operating loss, its only entry on line 29 is the dividends-received deduction of \$8,000 from Schedule C, page 2. Enter this amount on lines 29b and 29c. Taxable income on line 30 is \$200,350.

Tax summary. Enter on line 31 the total tax (\$55,387) from Schedule J, page 3. List payments that you can apply against the tax on line 32. The only payments on the Tentex return are four estimated tax deposits totaling \$69,117. Enter this amount on lines 32b, 32d, and 32h. The resulting overpayment is \$13,730, which Tentex chooses to have credited to its 1997 estimated tax. Tentex could have the overpayment refunded.

Signature. An authorized corporate officer must manually sign the return.

Page 2

Schedule A—Cost of Goods Sold. Use Schedule A to report your cost of goods sold. This figure is beginning inventory, plus merchandise bought or produced during the year, less ending inventory. Because Tentex is a manufacturer, it must account for its costs of manufacturing as part of cost of goods sold. It valued goods on hand at the beginning of the year at \$126,000 and at the end of the year at \$298,400, using the lower of cost or market.

Add cost of goods manufactured during the year to beginning inventory. This cost consists of three items: direct materials, direct labor, and overhead. List material costs of \$1,127,100 on line 2. This includes subcontracted parts as well as raw materials.

Salaries and wages on line 3 are \$402,000. This amount includes wages paid to production-line workers and the part of the supervisory salaries that was for actual production of goods. It also includes 30% of the salaries paid to officers. Do not include payments already deducted on line 12 or 13 of page 1.

The \$40,000 on line 4 is for indirect general administration costs. Other costs of \$123,300 appear on line 5. These costs include factory overhead such as electricity, fuel, water, small tools, and depreciation on production-line machinery. This example does not show the supporting itemization. Note that \$12,400 is depreciation on the assets used in the direct operations of the business.

Lines 9a through 9f. Check all of the boxes that apply to the business.

Schedule C—Dividends and Special Deductions. Dividend income is \$10,000, all of which qualified for the 80% dividends-received deduction, line 2, because Tentex is a 20%-or-more owner. Enter the total dividends received on line 19, Schedule C, and on line 4 of page 1. Enter the total dividends-received deduction on line 20, Schedule C and on line 29b of page 1.

Schedule E—Compensation of Officers. Complete this schedule only if your total receipts (line 1a plus lines 4 through 10 of page 1) are \$500,000 or more. (Tentex meets this requirement.) Since Tentex has only three officers, these are the only entries on the schedule. Include here only compensation for services rendered. Do not include dividends on stock held by the corporate officers.

Page 3

Schedule J—Tax Computation. Use the tax rate schedules in the form instructions to figure the tax on line 3. Applying the rates to Tentex's taxable income of \$200,350 results in income tax of \$61,387. Decrease this amount by the work opportunity credit of \$6,000, resulting in a total tax of \$55,387.

Figure the work opportunity credit on Form 5884. Tentex files Form 5884 (not illustrated) with its return to support this credit.

Other taxes and credits listed on Schedule J do not apply to Tentex for 1996.

Schedule K—Other Information. Answer all questions that apply to the business.

Page 4

Schedule L—Balance Sheets. Provide comparative balance sheets for the beginning and end of the tax year. Entries on this page should agree with amounts shown elsewhere on the return. For example, the figures for beginning and ending inventories must be the same as those appearing on Schedule A, page 2. Note that the appropriated retained earnings of Tentex increased from \$30,000 to \$40,000 during the year, due to the setting aside of \$10,000 as a reserve for contingencies. Tentex took this amount out of unappropriated retained earnings, as shown on Schedule M-2.

Schedules M-1 and M-2. Tentex completes Schedules M-1 and M-2 because the amount of total assets (line 15, column (d), Schedule L) is over \$25,000. To properly complete these schedules, you need additional information from the books and records. The following

profit and loss account appeared in the books of Tentex for the calendar year 1996:

Account	Debit	Credit
Gross sales.....		\$2,010,000
Sales returns and allowances.....	\$ 20,000	
Cost of goods sold.....	1,520,000

Taxes.....	15,000	
Interest expense:		
On loan to buy tax-exempt bonds \$ 850		
Other <u>27,200</u>		28,050
Contributions:		
Deductible \$24,000		
Other <u>500</u>		24,500
Depreciation—indirect.....	3,580	
Advertising.....	8,700	
Other expenses of operations.....	78,300	
Loss on securities.....	3,600	
Federal income tax accrued.....		55,387
Net income per books after tax.....		<u>147,783</u>
Total	<u>\$2,040,000</u>	<u>\$2,040,000</u>

Tentex analyzed its retained earnings and the following appeared in this account on its books:

Item	Debit	Credit
Balance, January 1, 1996.....		\$238,000
Net profit (before federal income tax).....		203,170
Reserve for contingencies \$ 10,000		
Income tax accrued for 1996.....	55,387	
Dividends paid during 1996	65,000	
Refund of 1993 income tax		18,000
Balance, December 31, 1996.....	<u>328,783</u>	
Total	<u>\$459,170</u>	<u>\$459,170</u>

Schedule M-1—Reconciliation of Income (Loss) per Books With Income per Return. Schedule M-1 starts with the net income (loss) per books, after reduction for federal income tax accrued, as shown in the corporation's profit and loss account. It provides for necessary adjustments to reconcile this

amount with the taxable income shown on line 28, page 1.

Line 1. \$147,783 is the net income per books. It appears in the profit and loss account as net income per books after tax.

Line 2. \$55,387 is the federal income tax accrued for the tax year.

Line 3. \$3,600 is the excess of capital losses over capital gains. The net loss is from the sale of securities.

Line 4. This would show all income subject to tax but not recorded on the books for this year. This can happen if the corporation valued assets on its books at an amount greater than that used for tax purposes. When it has a sale of these assets, the gain included in taxable income is greater than that recorded on the books. It shows the difference here.

Line 5. Tentex shows expenses recorded on its books that it does not deduct. The \$850 listed on line 5b is for contributions over the 10% limit. Tentex itemizes the remaining non-deductible expenses on a statement (not illustrated) attached to the return. These include the following:

Premiums paid on term life insurance on corporate officers	\$ 9,500
Interest paid to purchase tax-exempt securities	850
Nondeductible contributions	500
Reduction of salaries by work opportunity credit	<u>6,000</u>
Total	<u>\$16,850</u>

Line 6. Enter the total of lines 1 through 5.

Line 7. This is income recorded on the corporation's books during the year that is not taxable and is not included on the return. This total, \$14,500, includes insurance proceeds of \$9,500 and tax-exempt interest on state bonds of \$5,000.

Line 8. This includes all deductions claimed for tax purposes but not recorded in the corporation's books. Tentex enters \$1,620 on line 8a. This is the difference between depreciation claimed on the tax return and the depreciation shown on the corporation's books. If the corporation had other deductions to itemize on this line but not enough space, it would attach an itemized statement to the return.

Line 9. Enter \$16,120, the total of lines 7 and 8.

Line 10. The difference, \$208,350, between lines 6 and 9 must agree with line 28, page 1.

Schedule M-2—Analysis of Unappropriated Retained Earnings per Books. Schedule M-2 analyzes the unappropriated retained earnings as shown in the corporation's balance sheets on Schedule L.

Line 1. This is from line 25 of Schedule L for the beginning of the tax year. Tentex enters \$238,000.

Line 2. This is the net income per books (after federal income tax), \$147,783.

Line 3. This shows all other increases to retained earnings. Enter the \$18,000 refund of 1993 income tax.

Line 4. This is the total of lines 1, 2, and 3.

Line 5. This includes all distributions to shareholders charged to retained earnings during the tax year. Enter the \$65,000 dividends paid.

Line 6. This shows any decreases (other than those on line 5) in unappropriated retained earnings. These decreases are not deductible on the tax return at the time of the appropriation, but a deduction may be allowable on a later return. A common example is amounts set aside for contingencies. A customer was injured on company property during 1996 and the company retained an attorney. Tentex set up a contingent liability of \$10,000 for the customer's claim. If they settle the claim during 1997 for \$5,000 and the attorney's fee is \$2,500, Tentex will charge \$7,500 to retained earnings (appropriated). It will also deduct \$7,500 in arriving at taxable income for 1997. Another common example of items entered on this line is the payment of the prior year's federal tax. Attach a schedule to the return listing all items taken into account for the amount shown on this line.

Line 7. This is the total of lines 5 and 6.

Line 8. \$328,783 is Tentex's retained earnings at the end of its tax year. It determined this figure by subtracting the total on line 7 from the total on line 4. This figure must agree with the amount on Schedule L for the end of the tax year.

U.S. Corporation Income Tax Return

1996

For calendar year 1996 or tax year beginning, 1996, ending, 19 ..
▶ Instructions are separate. See page 1 for Paperwork Reduction Act Notice.

- A** Check if a:
- 1 Consolidated return (attach Form 851)
 - 2 Personal holding co. (attach Sch. PH)
 - 3 Personal service corp. (as defined in Temporary Regs. sec. 1.441-4T—see instructions)

Use **IRS** label. Otherwise, print or type.

Schedule A Cost of Goods Sold (See page 11 of instructions.)

1	Inventory at beginning of year	126,000
2	Purchases	1,127,100
3	Cost of labor	402,000
4	Additional section 263A costs (attach schedule)	40,000
5	Other costs (attach schedule)	123,300
6	Total. Add lines 1 through 5	1,818,400
7	Inventory at end of year	298,400
8	Cost of goods sold. Subtract line 7 from line 6. Enter here and on page 1, line 2	1,520,000

9a Check all methods used for valuing closing inventory:

- (i) Cost as described in Regulations section 1.471-3
- (ii) Lower of cost or market as described in Regulations section 1.471-4
- (iii) Other (Specify method used and attach explanation.)

b Check if there was a writedown of subnormal goods as described in Regulations section 1.471-2(c)

c Check if the LIFO inventory method was adopted this tax year for any goods (if checked, attach Form 970)

d If the LIFO inventory method was used for this tax year, enter percentage (or amounts) of closing inventory computed under LIFO

e If property is produced or acquired for resale, do the rules of section 263A apply to the corporation? Yes No

f Was there any change in determining quantities, cost, or valuations between opening and closing inventory? If "Yes," attach explanation Yes No

Note: You are not required to complete Schedules M-1 and M-2 below if the total assets on line 15, column (d) of Schedule L are less than \$25,000.

Schedule M-1		Reconciliation of Income (Loss) per Books With Income per Return (See page 16 of instructions.)	
1	Net income (loss) per books	147,783	
2	Federal income tax	55,387	
3	Excess of capital losses over capital gains	3,600	
4	Income subject to tax not recorded on books this year (itemize):		
5	Expenses recorded on books this year not deducted on this return (itemize):		
a	Depreciation \$		
b	Contributions carryover \$ 850		
c	Travel and entertainment \$		
	See attached itemized statement (not shown) \$ 16,850		
6	Add lines 1 through 5	17,700	
7	Income recorded on books this year not included on this return (itemize):		
	Tax-exempt interest \$ 5,000		
	Insurance proceeds 9,500		
8	Deductions on this return not charged against book income this year (itemize):		
a	Depreciation \$ 1,620		
b	Contributions carryover \$		
9	Add lines 7 and 8	1,620	
10	Income (line 28, page 1)—line 6 less line 9	208,350	

Schedule M-2		Analysis of Unappropriated Retained Earnings per Books (Line 25, Schedule L)	
1	Balance at beginning of year	238,000	
2	Net income (loss) per books	147,783	
3	Other increases (itemize):		
	Refund of 1993 income tax due to IRS examination	18,000	
4	Add lines 1, 2, and 3	403,783	
5	Distributions:		
a	Cash		65,000
b	Stock		
c	Property		
6	Other decreases (itemize):		
	Reserve for contingencies		20,000
7	Add lines 5 and 6		75,000
8	Balance at end of year (line 4 less line 7)		328,783

How To Get More Information

You can get help from the IRS in several ways.

Free publications and forms. To order free publications and forms, call 1-800-TAX-FORM (1-800-829-3676). You can also write to the IRS Forms Distribution Center nearest you. Check your income tax package for the address. Your local library or post office also may have the items you need.

For a list of free tax publications, order Publication 910, *Guide to Free Tax Services*. It also contains an index of tax topics and related publications and describes other free tax information services available from IRS, including tax education and assistance programs.

If you have access to a personal computer and modem, you also can get many forms and publications electronically. See *Quick and Easy Access to Tax Help and Forms* in your income tax package for details. If space permitted, this information is at the end of this publication.

Tax questions. You can call the IRS with your tax questions. Check your income tax package or telephone book for the local number, or you can call 1-800-829-1040.

TTY/TDD equipment. If you have access to TTY/TDD equipment, you can call 1-800-829-4059 to ask tax questions or to order forms and publications. See your income tax package for the hours of operation.
